1.2 Concept

Falling is the most common cause of damage resulting from accidents among seniors. Once a patient has fallen, they run a higher risk of falling again. The right approach can effectively reduce the risk of falling among seniors.

1.3 Mindmap

1.4 Purpose

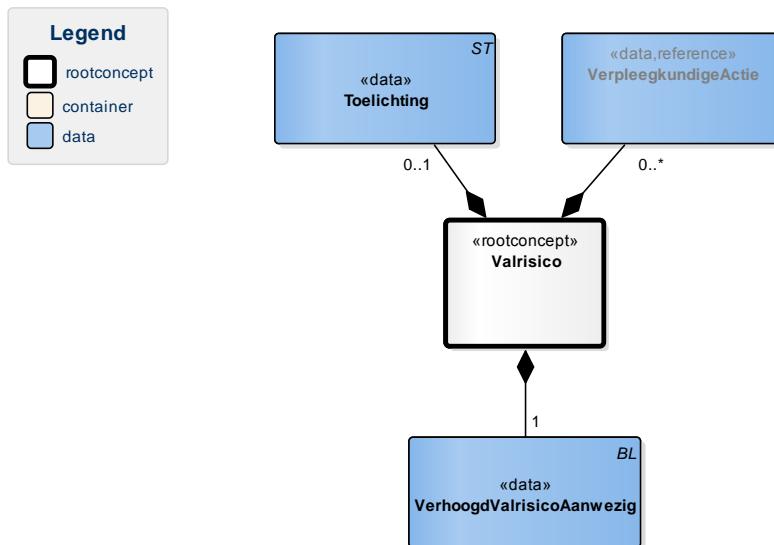

Screening for the fall risk can determine the height of the risk. Recording an increased fall risk

informs other healthcare providers of this risk. Preventative procedures can be implemented based on this information.
