## 1.1 Revision History

Publicatieversie 1.0 (01-07-2015)

## 1.2 Concept

Sight is the ability to observe lit objects, with the goal of orienting yourself on objects and people in a lit environment. This pertains to observing the light stimuli, and not processing them in the brain. A sight disorder can lead to things including orientation problems.

## 1.3 Mindmap

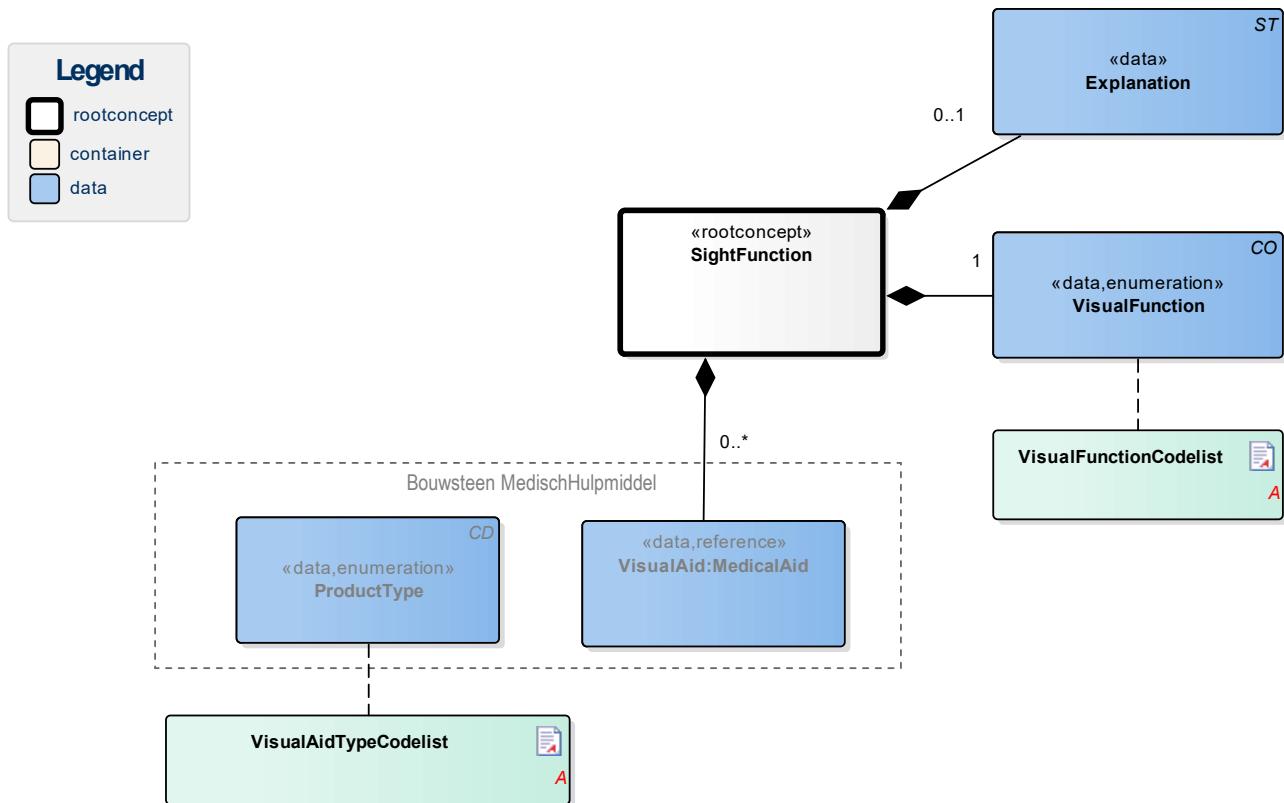

## 1.4 Purpose

Information on visual function disorders is important in patient care and treatment and particularly in the communication with the patient. Based on this information, healthcare can be adjusted to the patient's limitations if needed.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

«rootconcept»	SightFunction
<b>Definitie</b>	Root concept of the SightFunction building block. This concept contains all data elements of the SightFunction building block.
<b>Datatype</b>	
<b>DCM::ConceptId</b>	NL-CM:4.16.1
<b>Opties</b>	

«data»	VisualFunction
<b>Definitie</b>	Visual function is the sensory function linked to observing the presence of light and observing the shapes, sizes, contours and colors of visual stimuli. It includes visual acuity, visual field, and visual quality, and disorders such as color-blindness, tunnel vision, night-blindness and light adaptation. This concept describes the presence of a disorder in this function and the extent of the disorder.

The program ‘Registratie aan de Bron’ [Registration at the Source] is a collaboration between the NFU (Nederlandse Federatie van Universitair Medische Centra, [Netherlands Federation of University Medical Centers]) and Nictiz, hereinafter referred to as the partners. Other parties outside the university medical centers and Nictiz also made important contributions to and worked within ‘Registration at the Source’. The parties pay the utmost attention to the reliability and topicality of the data in these Healthcare Information Building Blocks (Clinical Building Block). Omissions and inaccuracies may however occur. The parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provided by the parties to you or by you to the parties via a website or via e-mail, or any other digital means.

The parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of this Healthcare Information Building Block.

The parties will not accept any liability for the content of information in this Healthcare Information Building Block to which or from which a hyperlink is referred.

In the event of contradictions in said Healthcare Information Building Block documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of this Healthcare Information Building Block is also distributed in writing, the written version will be leading in cases of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.
