1.1 Revision History

Publicatieversie 1.0 (01-04-2015)

Bevat: ZIB-109, ZIB-132, ZIB-203, ZIB-204, ZIB-306, ZIB-308, ZIB-352.

Incl. algemene wijzigingsverzoeken:

ZIB-94, ZIB-154, ZIB-200, ZIB-201, ZIB-309, ZIB-324, ZIB-326.

Publicatieversie 3.0 (01-05-2016)

Bevat: ZIB-453

1.2 Concept

An alert describes a clinical or administrative fact brought to the attention of the users of the clinical systems to be taken into account when shaping diagnostic and therapeutic policy or in dealing with the patient, usually because of a safety risk.

Disorders that describe the body's sensitivity to a substance which results in a specific physiological reaction after being exposed to that substance are referred to as allergies. These are described in a separate information model.

Warnings for non-allergic disorders can concern:

- A disorder (condition or diagnosis which can be considered as a contraindication for the use of groups of medication or undergoing a certain type of therapy), such as pregnancy or long QT syndrome
- Impaired functioning of an organ system (heart failure, impaired liver or kidney function, weakened

immune system)

- Risk of spreading certain microorganisms (multi-resistant bacteria, tubercle bacilli, HIV, HBV, Ebola virus)
- Other risks

1.3 Mindmap

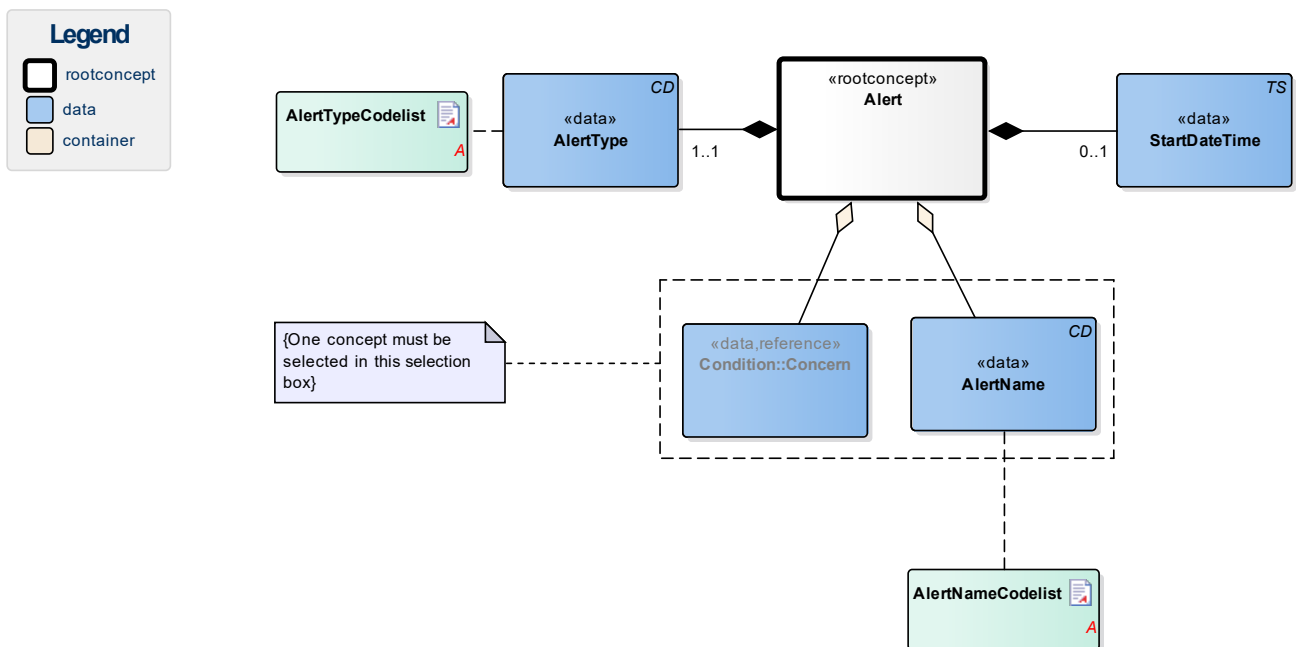

1.4 Purpose

Documenting and entering disorders or conditions that require attention is an important part of medical registration. It concerns the core of patient safety. In the execution of research and treatment, these patient characteristics - which are marked as a warning - constantly have to be taken into account. They provide information that is important for the patient’s condition and the options a healthcare provider has for therapy. Disorders that are registered or transferred as an Alert can also be described as a Problem. The difference is in the fact that the healthcare provider considers the problem as an Alert = warning. In many cases, transfer will be subject to strict privacy rules, as the warning will not always elicit an adequate reaction in the informed environment.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model

«rootconcept»	Alert
Definitie	Root concept of the Alert information model. This root concept contains all data elements of the Alert information model.

Datatype	
DCM::ConceptId	NL-CM:8.3.1
Opties	

«data»	Condition::Concern	
Definitie	<p>The patient's health problem or condition that is the subject of the alert. This could involve a patient's problem, condition or diagnosis that is seen as a contraindication in prescribing medication or which has to be taken into account when shaping diagnostic and therapeutic policy. This can be in the patient's own interest, or it can involve a problem or disorder that can make the patient a risk to their surroundings, such as an infection hazard. These are references to conditions included on the patient's problem list.</p> <p>If there is a contraindication, the code system G-Standard Contraindications (Table 40) from the ProblemNameCodeList of the ConcernTransfer information model should be used.</p>	
Datatype		
DCM::ConceptId	NL-CM:8.3.3	
DCM::ExampleValue	VERMINDERDE NIERFUNCTIE	
DCM::ReferencedConceptId	NL-CM:5.1.1	This is a reference to concept Concern in information model OverdrachtConcern.
Opties		

«data»	AlertName	
Definitie	<p>A warning, other than a condition or problem. For example, a patient can be given an 'Aggressive patient' alert.</p> <p>The warning can be entered in code (there are codes for frequently used alerts), but seeing the dynamic nature of the warnings cf. SARS and Ebola, these alerts will often be entered as free text.</p>	
Datatype	CD	
DCM::ConceptId	NL-CM:8.3.4	
DCM::ValueSet	AlertNameCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.2
Opties		

«data»	StartDateTime
Definitie	<p>The date and time at which the described condition was entered as a warning.</p> <p>This can be an exact date and time, or a rough indication of the date (such as only the year, or the month and the year).</p>
Datatype	TS
DCM::ConceptId	NL-CM:8.3.5
DCM::ExampleValue	09-10-2011
Opties	

«data»	AlertType
Definitie	Indicates the type of alert, meaning a rough description of the cause or origin of the warning.
Datatype	CD
DCM::ConceptId	NL-CM:8.3.6
DCM::ExampleValue	Conditie

DCM::ValueSet	AlertTypeCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.1

This Health and Care Information Model (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of this Health and Care Information Model. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of this Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the information in this Health and Care Information Model without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on information from this Health and Care Information Model.
