1.2 Concept

The treatment objective describes the desired result of the treatment/interventions in terms of the patient's diagnosed problem. The objective and target date are entered in addition to the target value. Comparing the healthcare results to the treatment objective provides insight into the effectivity of the treatment/interventions.

1.3 Mindmap

1.4 Purpose

A treatment objective is recorded to indicate the intention of the treatment/intervention. It provides an indication of the procedures to be carried out as part of the care process. This also enables us to monitor developments in the patient's health condition for the desired healthcare result.
