Bevat: ZIB-1535.

1.2 Concept

Medical devices are any internally implanted and external devices and/or aids used by the patient (in the past) to reduce the effects of functional limitations in organ systems or to facilitate the treatment of a disease.

1.3 Purpose

Data on medical devices is recorded for several reasons. Knowledge of the presence of these implants enables tracing and taking the aid or device into account in diagnostic or therapeutic procedures, care and transport.

Examples include:

- Consequences for transportation, toilet use, etc., in the case of a wheelchair;
- A pacemaker can be of medical importance, but also has consequences for planning radiological exams.

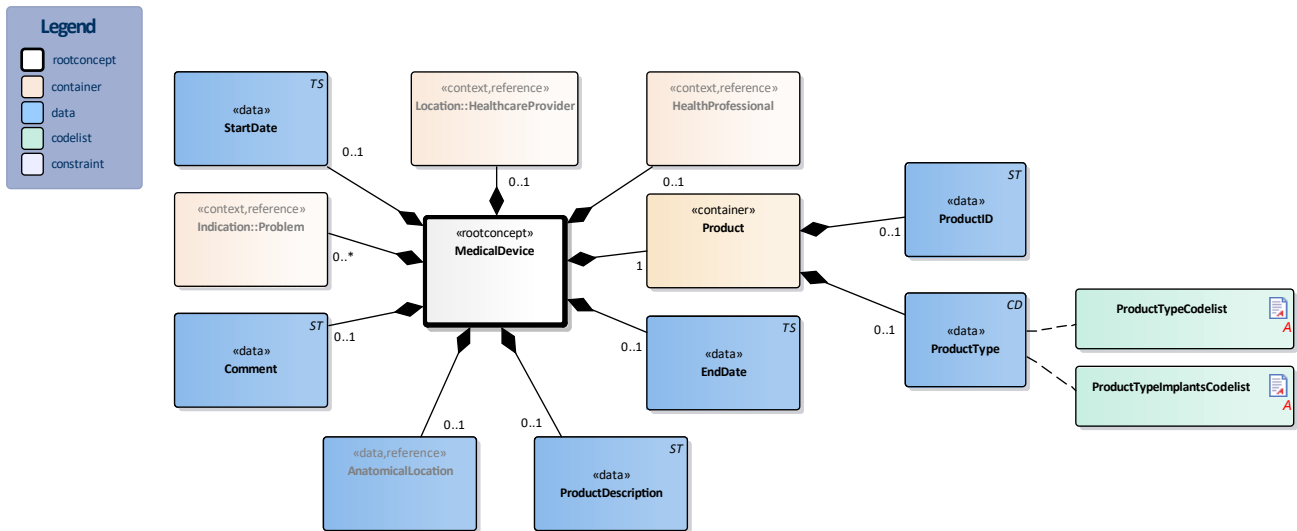

1.4 Patient Population

1.5 Evidence Base

Recording data on medically complex devices such as pacemakers is not yet common in EPD systems in the Netherlands, but is sometimes lacking: a letter from a specialist for example often does not include information on which type of pacemaker the patient has (and from which manufacturer).

The Dutch Ministry of Health, Welfare and Sport (VWS) will pass legislation for a national basic register of implants. Every healthcare center will have to supply a UDI (Unique Device Identification, with a link to GTIN) and a UPI (Unique Patient Identification) to the basic register. This will prevent situations in which a large group of patients have an aid or implant in which problems have been detected that cannot be traced.

1.6 Information Model

«rootconcept»	MedicalDevice
Definitie	Root concept of the MedicalDevice information model. This root concept contains all data elements of the MedicalDevice information model.
Datatype	
DCM::ConceptId	NL-CM:10.1.1
DCM::DefinitionCode	SNOMED CT: 49062001 Device (physical object)
Opties	

«data»	ProductID
Definitie	Globally unique identification of the product, for example the serial number or an UDI (unique device identifier). For some products, the law requires the use of a UDI. Commonly used coding rings are HIBC and GS1/GTIN. An UDI often contains more information than just an ID, but also, for example, an expiration date. If a UDI is used, the entire code can be included as text in Product Id, so that no important information is lost.
Datatype	ST
DCM::ConceptId	NL-CM:10.1.16
Opties	

«container»	Product
Definitie	The medical device (internally or externally).
Datatype	
DCM::ConceptId	NL-CM:10.1.2
DCM::DefinitionCode	SNOMED CT: 405815000 Procedure device
Opties	

«data»	ProductType
Definitie	The code of the type of product.
Datatype	CD
DCM::ConceptId	NL-CM:10.1.3
DCM::ExampleValue	58938008 Wheelchair
DCM::ValueSet	ProductTypeImplantsCodelist OID: 2.16.840.1.113883.2.4.3.11.60.40.2.10.1.6
DCM::ValueSet	ProductTypeCodelist OID: 2.16.840.1.113883.2.4.3.11.60.40.2.10.1.1

Opties	
---------------	--

«data»	ProductDescription
Definitie	Textual description of the product.
Datatype	ST
DCM::ConceptId	NL-CM:10.1.13
Opties	

«data»	AnatomicalLocation	
Definitie	Patient's anatomical location of the medical device used.	
Datatype		
DCM::ConceptId	NL-CM:10.1.15	
DCM::DefinitionCode	SNOMED CT: 363698007 Finding site	
DCM::ExampleValue	Rechter oor	
DCM::ReferencedConceptId	NL-CM:20.7.1	This is a reference to the rootconcept of information model AnatomicalLocation.
Opties		

«context»	Indication::Problem	
Definitie	The medical reason for use of the medical device.	
Datatype		
DCM::ConceptId	NL-CM:10.1.7	
DCM::ExampleValue	presbycusis (ICD10::H91.1)	
DCM::ReferencedConceptId	NL-CM:5.1.1	This is a reference to the rootconcept of information model Problem.
Opties		

«data»	StartDate
Definitie	The start date of the first use or implant of the medical device. A 'vague' date, such as only the year, is permitted.
Datatype	TS
DCM::ConceptId	NL-CM:10.1.11
DCM::ExampleValue	24-02-2003
Opties	

«data»	EndDate
Definitie	The end date of the last use or explant of the medical device. A 'vague' date, such as only the year, is permitted.
Datatype	TS
DCM::ConceptId	NL-CM:10.1.14
DCM::ExampleValue	26-03-2008
Opties	

«data»	Comment
Definitie	Comment about use or information on the medical device used.
Datatype	ST
DCM::ConceptId	NL-CM:10.1.10
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment
Opties	

«context»	Location::HealthcareProvider
Definitie	The healthcare provider at which use of the medical device was initiated or

	where the aid was implanted.	
Datatype		
DCM::ConceptId	NL-CM:10.1.8	
DCM::ReferencedConceptId	NL-CM:17.2.1	This is a reference to the rootconcept of information model HealthcareProvider
Opties		

«context»	HealthProfessional	
Definitie	The healthcare provider involved in the indication for use of the medical device implant.	
Datatype		
DCM::ConceptId	NL-CM:10.1.9	
DCM::ReferencedConceptId	NL-CM:17.1.1	This is a reference to rootconcept of information model HealthProfessional
Opties

1.16 Traceability to other Standards

1.17 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.18 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.19 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
