1.1 Revision History

Publicatieversie 1.0 (15-02-2013)

Publicatieversie 1.1 (01-07-2013)

Publicatieversie 2.0 (01-04-2015)
Bevat: ZIB-73, ZIB-308.

Incl. algemene wijzigingsverzoeken:
ZIB-94, ZIB-154, ZIB-200, ZIB-201, ZIB-309, ZIB-324, ZIB-326.

Publicatieversie 3.0 (01-05-2016)
Bevat: ZIB-444, ZIB-453.

Publicatieversie 3.1 (04-09-2017)
Bevat: ZIB-443, ZIB-564, ZIB-574.

1.2 Concept

The family history describes any health problems of biological relatives that may be relevant. The family history contains information on the medical disorders of the family member and the biological relationship between the patient and the described family member.

1.3 Mindmap

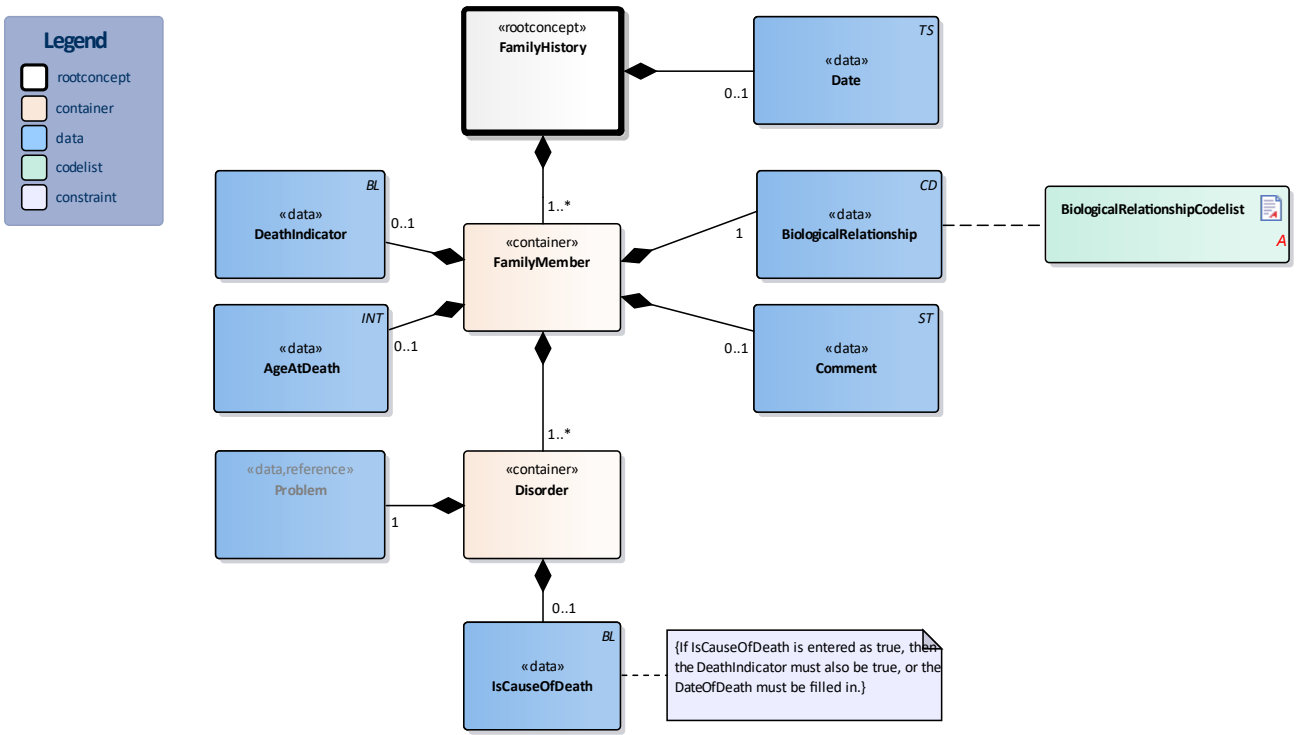
1.4 Purpose

Recording the patient's family members' health problems. This component can be relevant in estimating the risk of these health problems occurring in the patient. This component can also partially influence the decision determining which diagnostics are or are not to be run: a high-risk patient might be more likely to receive extensive diagnostics, while a simpler test could suffice for a low-risk patient.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model



«rootconcept»	FamilyHistory	
Definitie	Root concept of the FamilyHistory information model. This root concept contains all data elements of the FamilyHistory information model.	
Datatype		
DCM::ConceptId	NL-CM:6.1.1	
Opties		

«data»	Date	
Definitie	Date on which the family history was entered. A 'vague' date is permitted.	
Datatype	TS	
DCM::ConceptId	NL-CM:6.1.2	
DCM::ExampleValue	3-1999	
Opties		

«container»	FamilyMember

Definitie	Container of the FamilyMember concept. This container contains all data elements of the FamilyMember concept.	
Datatype		
DCM::ConceptId	NL-CM:6.1.3	
Opties		

«data»	BiologicalRelationship	
Definitie	Indicates the biological relationship of the family member to the patient.	
Datatype	CD	
DCM::ConceptId	NL-CM:6.1.4	
DCM::ExampleValue	Broer	
DCM::ValueSet	BiologicalRelationshipCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.6.1.1
Opties		

«data»	Comment	
Definitie	Comment with information on the family member which might be relevant to the family history.	
Datatype	ST	
DCM::ConceptId	NL-CM:6.1.5	
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment	
Opties		

«data»	DeathIndicator	
Definitie	An indication stating whether the family member has died.	
Datatype	BL	
DCM::ConceptId	NL-CM:6.1.10	
DCM::ExampleValue	Ja	
Opties		

«data»	AgeAtDeath	
Definitie	The age at which the family member died.	
Datatype	INT	
DCM::ConceptId	NL-CM:6.1.12	
DCM::ExampleValue	75	
Opties		

«container»	Disorder	
Definitie	Container of the Disorder concept. This container contains all data elements of the Disorder concept.	
Datatype		
DCM::ConceptId	NL-CM:6.1.6	
Opties		

«data»	Problem	
Definitie	The health problem of the family member in question, which is recorded for the family history.	
Datatype		
DCM::ConceptId	NL-CM:6.1.7	
DCM::ReferencedConceptId	NL-CM:5.1.1	This is a reference to the rootconcept of information model Probleem.
Opties		

«data»	IsCauseOfDeath	
Definitie	Indication stating whether the described health problem was the cause of death of the family member.	
Datatype	BL	
DCM::ConceptId	NL-CM:6.1.9	
Opties		

«document»	BiologicalRelationshipCodelist	
Definitie		
Datatype		
DCM::ValueSetBinding	Extensible	
DCM::ValueSetId	2.16.840.1.113883.2.4.3.11.60.40.2.6.1.1	
Opties		

BiologischeRelatieCodelijst			**OID: 2.16.840.1.113883.2.4.3.11.60.40.2.6.1.1**	
Concept Name	**Code**	**Code System**	**Code System OID**	**Description**
Aunt	AUNT	RoleCode	2.16.840.1.113883.5.111	Tante
Cousin	COUSN	RoleCode	2.16.840.1.113883.5.111	Neef/nicht, zoon/dochter van oom/tante

1.8 Example Instances

Familieanamnese									
Datum	Familielid				Aandoening				
	Biologische Relatie	Toelichting	Overlijdens Indicator	Overlijdens Datum	Probleem				Is Doodsoorzaak
					ProbleemType	ProbleemNaam	Probleem Status	Probleem StatusDatum	
1-2-2013	Tante / moeders-zijde		Ja	1997	Diagnose	mammacarcinoom	Actueel	1995	Ja
1-2-2013	Biologische moeder	moeder heeft vijf zusters			Diagnose	mammacarcinoom	Actueel	21-3-1999	
1-2-2013	Biologische vader		Ja	2005	Diagnose	myocardinfarct	Niet actueel	16-6-2001	

1.9 Instructions

The age at which a family member developed a disorder or the age at which the family member died can be included in the 'explanation' field if desired.

The value list *BiologicalRelationshipCodeList* contains a number of concepts which can be used for both biological and non-biological relatives: a step-father's brother can be listed as an uncle for lack of specific codes for step-uncle and real uncles. Therefore, when compiling the family history, make sure that only the biological relatives are considered.

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Modesl and these rights are owned by the cooperating parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
