### 1.1 Revision History

Publicatieversie 1.0 (01-07-2015)

Publicatieversie 3.0 (01-05-2016)

Bevat: ZIB-453

### 1.2 Concept

**! Attention: this information model is undergoing major revision. A new version will be available after summer.**

Sensory observation, also known as perception, is the process of obtaining, registering, interpreting, selecting and ordering sensory information.

The observation occurs when offering external stimuli to stimulus-specific receptors: the senses. Examples of stimuli include smells, heat and pressure.

The concept is limited to the function of the senses and any disorders of this function and does not include the interpretation of the observation in the brain.

Other information models are available for the hearing function and visual function.

## 1.3 Mindmap

## 1.4 Purpose

Senses are important for the patient to observe behavior in their environment. Information on disorders in this sensory observation function is important in patient nursing and particularly in communication with the patient. Based on this information, healthcare can be adjusted to the patient's limitations if needed.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

«rootconcept»	FunctieZintuiglijkeWaarneming
Definitie	Root concept of the SensoryObservationFunction information model. This concept contains all data elements of the SensoryObservationFunction information model.
Datatype	
DCM::DefinitionCode	NL-CM:4.25.1
Opties	

«data»	Zintuig
--------	---------

<b>Definitie</b>	A sense is a specialized organ system that enables organisms to perceive certain sense-specific stimuli.	
<b>Datatype</b>	CD	
<b>DCM::DefinitionCode</b>	NL-CM:4.25.2	
<b>DCM::ValueSet</b>	ZintuigCodelijst	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.4.25.1
<b>Opties</b>		

<b>«data»</b>	SensorischeFunctie	
<b>Definitie</b>	A sensory function is meant to enable the observation of external stimuli. The body has stimuli-specific senses. This concept describes the presence of a disorder in a sensory function and the extent of the disorder.	
<b>Datatype</b>	CO	
<b>DCM::DefinitionCode</b>	ICF: b279 Andere sensorische functies, anders gespecificeerd en niet gespecificeerd	
<b>DCM::DefinitionCode</b>	NL-CM:4.25.3	
<b>DCM::ValueSet</b>	SensorischeFunctieCodelijst	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.4.25.2
<b>Opties</b>		

<b>«data»</b>	Toelichting	
<b>Definitie</b>	An explanation of the sensory function.	
<b>Datatype</b>	ST	
<b>DCM::DefinitionCode</b>	NL-CM:4.25.4	
<b>DCM::DefinitionCode</b>	LOINC: 48767-8 Annotation comment	
<b>DCM::ExampleValue</b>	Patiënt heeft last van verstopte neus.	
<b>Opties</b>

## 1.18 Disclaimer

This Health and Care Information Model (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provided by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of this Health and Care Information Model. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of this Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

## 1.19 Terms of Use

The user may use the information in this Health and Care Information Model without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on information from this Health and Care Information Model.

## **1.20 Copyrights**
