1.1 Revision History

Publicatieversie 1.0 (26-02-2019)

Bevat: ZIB-670.

Publicatieversie 2.0 (01-09-2020)

Bevat: ZIB-1127, ZIB-1136.

1.2 Concept

A legal situation can concern a legal status and/or representation.

The legal status indicates the basis on which the patient is staying in a healthcare organization. This can be either voluntary or involuntary, however the legal status is always determined by a judge.

Representation is important in situations where a person is legally not competent to give permission and/or factually (partly) incapable of doing so. A representative supports and takes decisions in the interest of the representee when they cannot do so themselves (temporarily or permanently).

1.3 Mindmap

1.4 Purpose

Health professionals must be aware of the existence of a legal status or representation because this in part determines what type of care can be provided to the patient. For example, a supporting legal status can be required for using freedom restricting interventions. For a mentally incompetent patient, it must be clear that there is a representative for further decision-making: in this case, the health professional should follow

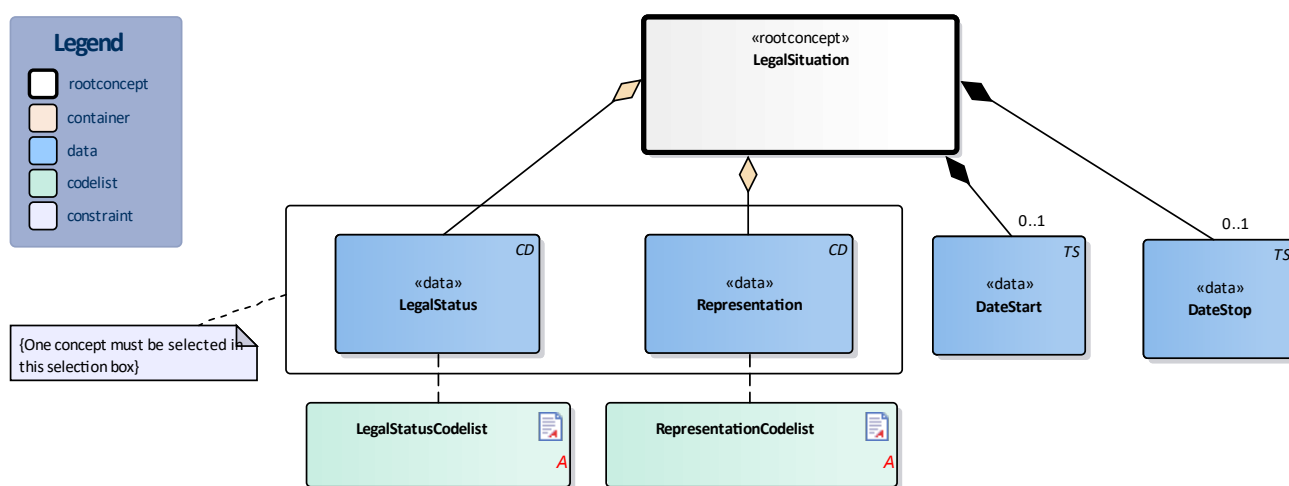

the decision of the representative of the mentally incompetent patient, unless this is incompatible with the care of a good health professional.

1.5 Patient Population

1.6 Evidence Base

In version 2.0, the new legal statuses resulting from the new legislation on involuntary / compulsory care have been added to the LegalStatus value list. In version 1.0 this list was based on the Vektis value list LegalStatus. However, this list is no longer maintained. That is why the value lists in the new version are based on an internal Nictiz codesystem.

1.7 Information Model

«rootconcept»	LegalSituation
Definitie	Root concept of the LegalSituation information model. This root concept contains all data elements of the LegalSituation information model.
Datatype	
DCM::ConceptId	NL-CM:7.17.1
Opties	

«data»	LegalStatus
Definitie	The legal status that applies to the patient. The legal status indicates the basis on which the patient is staying in a healthcare organization. This can be either voluntary or involuntary, however the legal status is always determined by a judge. A patient can also receive healthcare based on a forensic status.

Opties	

«data»	Representation
Definitie	In some situations, a person is legally not competent to give permission

	and/or factually (partly) incapable of doing so. A representative supports and takes decisions in the interest of the representee when they cannot do so themselves (temporarily or permanently). The representative should involve the patient as much as possible in the fulfillment of their tasks and the factual capability of the patient must be honored as much as possible. The Wgbo (Dutch law) determines who are able to become representatives as well as an enforced order.

1.9 Instructions

In case of an intervention, a distinction is made between seclusion and separation. For the purpose of unambiguous recording, the following definitions are used:

Seclusion:

Seclusion is the confinement of a patient for care, nursing and treatment in a specially designated seclusion room. A seclusion room is generally a bare single room with only a bed, sometimes with a table, a chair, a wardrobe and occasionally washing facilities. Seclusion may not take place in the "own" bedroom.

Separation:

Separation is the confinement of a patient in a specially designated enclosed space that has been approved as a separation residence; for several years now the term Extra Secure Room (EBK) has been used for this. The separation space is a specially equipped room, with a mattress or riveted bed and mostly without furniture. Separation should be applied with great caution. The risks of harmful side effects of separation, such as anxiety and stress, are significant. Also in the context of safety, separation should be avoided as much as possible and alternatives should be sought to avert the danger.

1.16 Functional Model

1.17 Traceability to other Standards

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under

the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
