## 1.1 Revision History

Publicatieversie 1.0 (04-09-2017)

Publicatieversie 2.0 (31-12-2017)

Bevat: ZIB-472, ZIB-618.

Publicatieversie 2.1 (06-07-2019)

Bevat: ZIB-781, ZIB-788, ZIB- 792, ZIB-795, ZIB-796, ZIB-797.

Publicatieversie 2.1.1 (31-01-2020)

Bevat: ZIB-789.

## 1.2 Concept

The prescribed substance is usually medication. However, medical aids and bandages can also be prescribed and supplied via the pharmacy. Food and blood products do not strictly belong in the medication category, but can be prescribed and supplied by a pharmacy as well.

A type of medication can be indicated with a **single code**. That code can be chosen from several possible coding systems (concretely: GPK, PRK, HPK or article numbers). Correct use of these codes in the software systems will sufficiently record the composition of the product used, making a complete product specification unnecessary.

In addition to a primary code, **alternative codes** from other coding systems can also be entered (so that the GPK can be sent along in the event that the patient was registered based on PRK, for example).

Entering multiple ingredients will enable you to display a compound product. If one of the composite parts is liquid, the dosage will be given in milliliters; otherwise it will be given in 'units'.

In that case, the **composition of the medication** can be specified implicitly (with the use of a medication code) or explicitly, for example by listing the (active) ingredient(s) of the medication.

**Magistral prescriptions** can be entered as well. This can be done by means of the option listed above to enter coded ingredients and/or by entering the composition and preparation method as free text. This is a partial information model

## 1.3 Mindmap

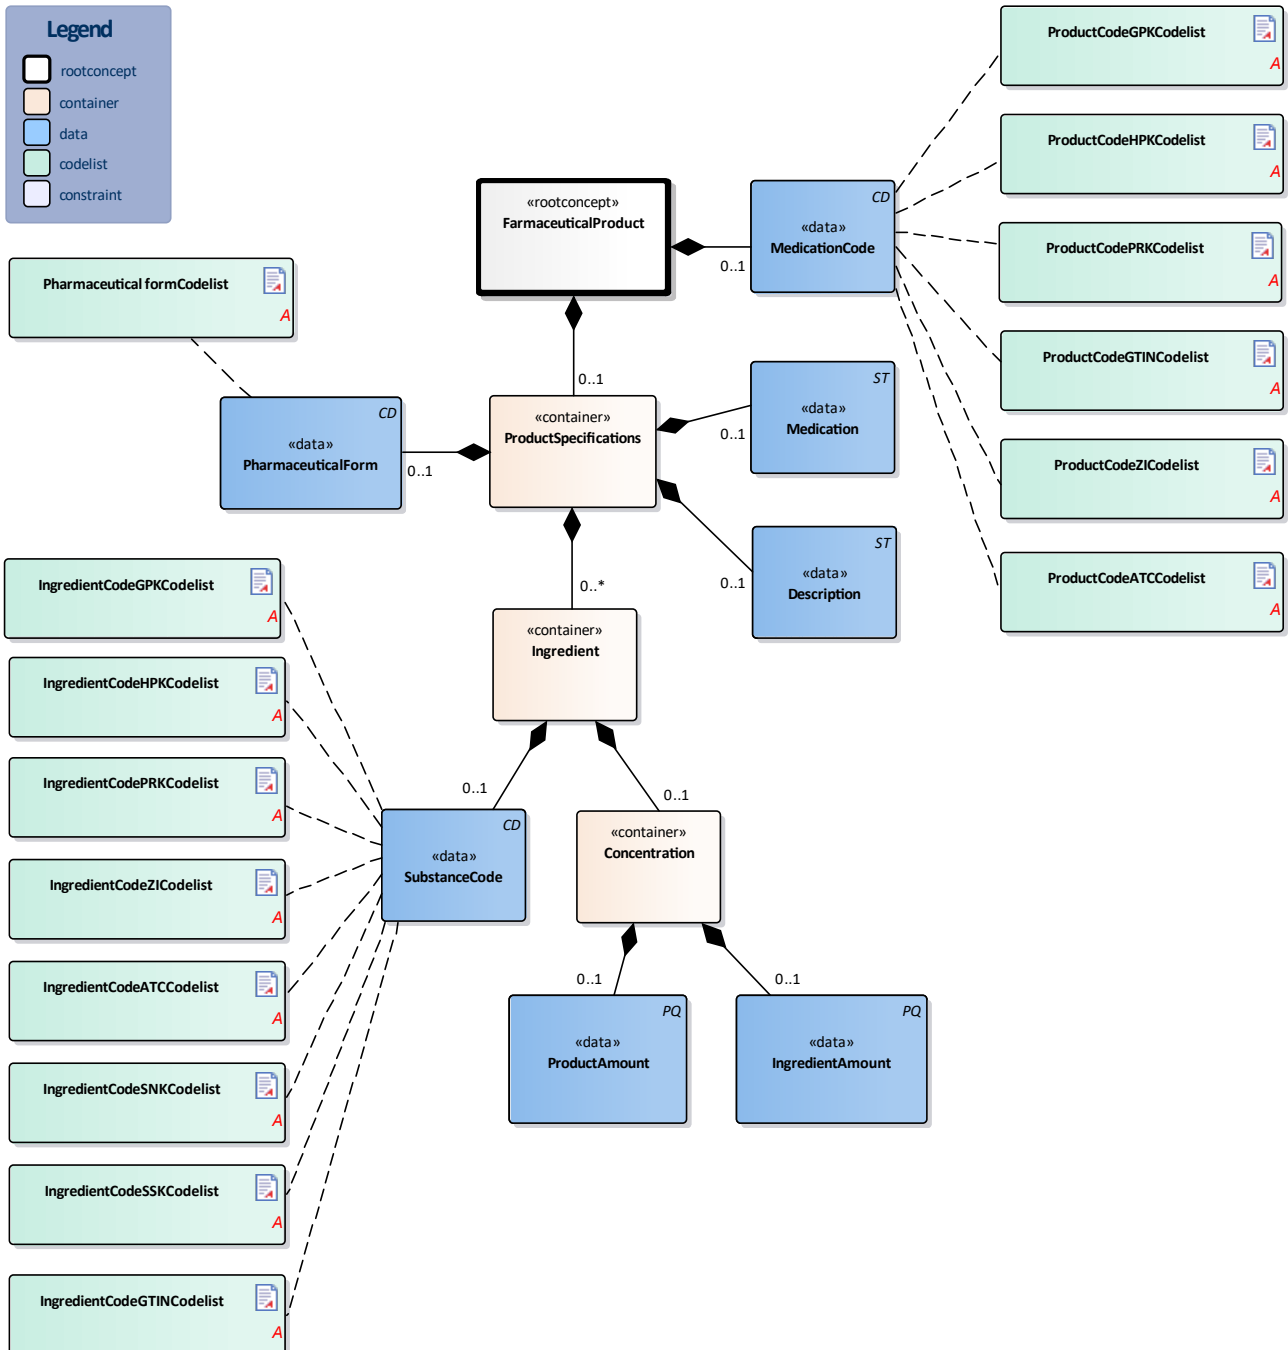

## 1.4 Purpose

The purpose of Product is to unambiguously describe the medication to be used.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

«rootconcept»	FarmaceuticProduct
<b>Definitie</b>	<p>Root concept of the FarmaceuticProduct partial information model. This root concept contains all data elements of the FarmaceuticProduct partial information model.</p> <p>The prescribed product is usually a medicine. However, medical aids and bandages can also be prescribed and supplied via the pharmacy. Strictly speaking, food and blood products do not belong in the medication category, but can be prescribed and supplied by a pharmacy as well.</p> <p>A type of medication can be indicated with a <b>single code</b>. That code can be chosen from several possible coding systems (concretely: GPK, PRK, HPK or article numbers). Correct use of these codes in the software systems will sufficiently record the composition of the product used, making a complete product specification unnecessary.</p> <p>In addition to a primary code, <b>alternative codes</b> from other coding systems</p>

	<p>can also be entered (so that the GPK can be sent along in the event that the patient was registered based on PRK, for example).</p> <p>Entering multiple ingredients will enable you to display a compound product. In that case, the <b>composition of the medication</b> can be specified implicitly (with the use of a medication code) or explicitly, for example by listing the (active) substance(s) of the medication.</p> <p><b>Prescriptions to be prepared by the pharmacy</b> can be entered as well. This can be done by means of the option listed above to enter coded ingredients and/or by entering the composition and preparation method as free text.</p>
<b>Datatype</b>	
<b>DCM::ConceptId</b>	NL-CM:9.7.19926
<b>Opties</b>	

«data»	MedicationCode
<b>Definitie</b>	<p>Coding medication in the Netherlands is done on the basis of the G standard (issued by Z-index), which is filled under the direction of KNMP.</p> <p>The coded medication can be expressed as:</p> <ul style="list-style-type: none"> <li>• GTIN International Article Number</li> <li>• ZI-nummer (2.16.840.1.113883.2.4.4.8)</li> <li>• Trade product code (HPK)</li> <li>• Prescription code (PRK)</li> <li>• Generic product code (GPK)</li> <li>• Anatomic Therapeutic Classification code (ATC)</li> <li>• Substance Name Code (SNK)</li> <li>• Substance Name Code, in combination with Route of Administration (SSK)</li> <li>• SNOMED CT code</li> </ul> <p>The GTIN enables identification of the product including its origin with a barcode. The ZI number represents the tradeproduct and the package size. The HPK is the code for the trade product (with the brand name) as used per dose/per time the medication is taken (1 pill, 1 puff, 1ml) The PRK contains als GPK information supplemented with information needed to prescribe the right product. this level is intended to facilitate generic prescription of drugs. The GPK defines the pharmaceutical characteristics of a product: ingredients, strengths, units, pharmaceutical form and route of administration. The Substance Name Code (SNK) is the (active) compound. Further information about the G-Standaard levels see <a href="https://www.z-index.nl">https://www.z-index.nl</a> So called 90.000.000 numbers are used in local IT systems. These numbers shall not be used for external communication. In the this is necessary only the description (not the code) may be included. This is in accordance with national agreements (Nictiz Standard).</p>

<b>Opties</b>		

<b>«container»</b>	<b>ProductSpecifications</b>	
<b>Definitie</b>	Container of the ProductSpecifications concept. This container contains all data elements of the ProductSpecifications concept.  Product specifications are required if the product code is not sufficient to ascertain the active substances and strength.	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:9.7.19928	
<b>Opties</b>		

<b>«data»</b>	<b>PharmaceuticalForm</b>	
<b>Definitie</b>	The pharmaceutical form indicates the form of the medication. Examples include: tablet, suppository, infusion liquid, ointment. If the product has a GPK code in the G standard, the form will be known in the G standard. For products without a code (free text, preparation by the pharmacy), the means of administration can be entered.	
<b>Datatype</b>	CD	
<b>DCM::ConceptId</b>	NL-CM:9.7.19931	
<b>DCM::ExampleValue</b>	230 (TABLET)	
<b>DCM::ValueSet</b>	Pharmaceutical formCodeList	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.9.7.8
<b>Opties</b>		

<b>«data»</b>	<b>Medication</b>	
<b>Definitie</b>	There is no code for medication entered in free text. In these cases, enter the complete description.	
<b>Datatype</b>	ST	
<b>DCM::ConceptId</b>	NL-CM:9.7.19929	
<b>DCM::ExampleValue</b>	PARACETAMOL 500MG TABLET	
<b>Opties</b>		

<b>«data»</b>	<b>Description</b>	
<b>Definitie</b>	A textual description of the type of medication (including relevant properties of the composition and preparation method if possible), which is only used if no coded indication from the G Standard is available (magistral preparation).	
<b>Datatype</b>	ST	
<b>DCM::ConceptId</b>	NL-CM:9.7.19784	
<b>Opties</b>		

«container»	Ingredient	
<b>Definitie</b>	<p>Container of the Ingredient concept. This container contains all data elements of the Ingredient concept.</p> <p>A product contains one or more active substances and excipients. These are usually determined by the product code. For medication prepared or compounded by the local pharmacy, each ingredient must be entered separately.</p> <p>The active substances play an important role, as they:</p> <p>a) determine the pharmacotherapeutic effect of the medication and b) serve as the basis for the indication of the strength of the medication (e.g. 200mg).</p>	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:9.7.19932	
<b>DCM::ExampleValue</b>	captopril	
<b>Opties</b>		

«data»	SubstanceCode	
<b>Definitie</b>	<p>Active substance or excipient.</p> <p>Here, the same codes can be used as for the ProductCode (for dilutions and compounds in particular), but now, the ATC, SSK and SNK codes can also be used to indicate a substance (to list ingredients of local products prepared by the pharmacy).</p> <ul style="list-style-type: none"> <li>• GTIN International Article Number</li> <li>• KNMP article number</li> <li>• Trade product code (HPK)</li> <li>• Prescription code (PRK)</li> <li>• Generic product code (GPK)</li> <li>• ATC (anatomic therapeutic classification)</li> <li>• SSK (substance name code with route of administration)</li> <li>• SNK (substance name code)</li> </ul> <p>For further explanation about ATC see <a href="https://www.whooc.no/atc/structure_and_principles/">https://www.whooc.no/atc/structure_and_principles/</a></p>

<b>Opties</b>		

«container»	Concentration
-------------	---------------

<b>Definitie</b>	The relative amount of this ingredient in this product. Calculation of Concentration = Ingredient Amount ÷ Product Amount.  This could be a concentration if the medication is dissolved in liquid, for example.	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:9.7.19933	
<b>DCM::ExampleValue</b>	25mg/stuk of 50IE/ml of 200mg/500ml	
<b>Opties</b>		

<b>«data»</b>	<b>IngredientAmount</b>	
<b>Definitie</b>	The amount and unit of this ingredient. This is the numerator for the calculation of the concentration. The unit should be selected from the G-Standard (Table 902).	
<b>Datatype</b>	PQ	
<b>DCM::ConceptId</b>	NL-CM:9.7.22277	
<b>DCM::ExampleValue</b>	5 ml 20 mg	
<b>Opties</b>		

<b>«data»</b>	<b>ProductAmount</b>	
<b>Definitie</b>	Amount of the product. This is the denominator for the calculation of the concentration. Optionally a translation to NHG table Gebruiksvoorschriften (Table 25) is also allowed.	
<b>Datatype</b>	PQ	
<b>DCM::ConceptId</b>	NL-CM:9.7.22278

## 1.16 Functional Model

## 1.17 Traceability to other Standards

## 1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

## 1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

## 1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.
