1.2 Concept

A nursing intervention is the care and/or treatment carried out by a nurse based on an expert opinion and clinical knowledge. It is part of the nursing process; interventions are determined as a result of indexed healthcare problems (nursing diagnoses) and based on treatment goals. Following the NEN-EN-ISO 18104 norm, it is possible to structure nursing interventions (or actions) in a hierarchy, where one intervention can be part of another intervention.

In a home care situation some actions can also be performed by the patient or a caregiver after a relevant instruction

1.3 Mindmap

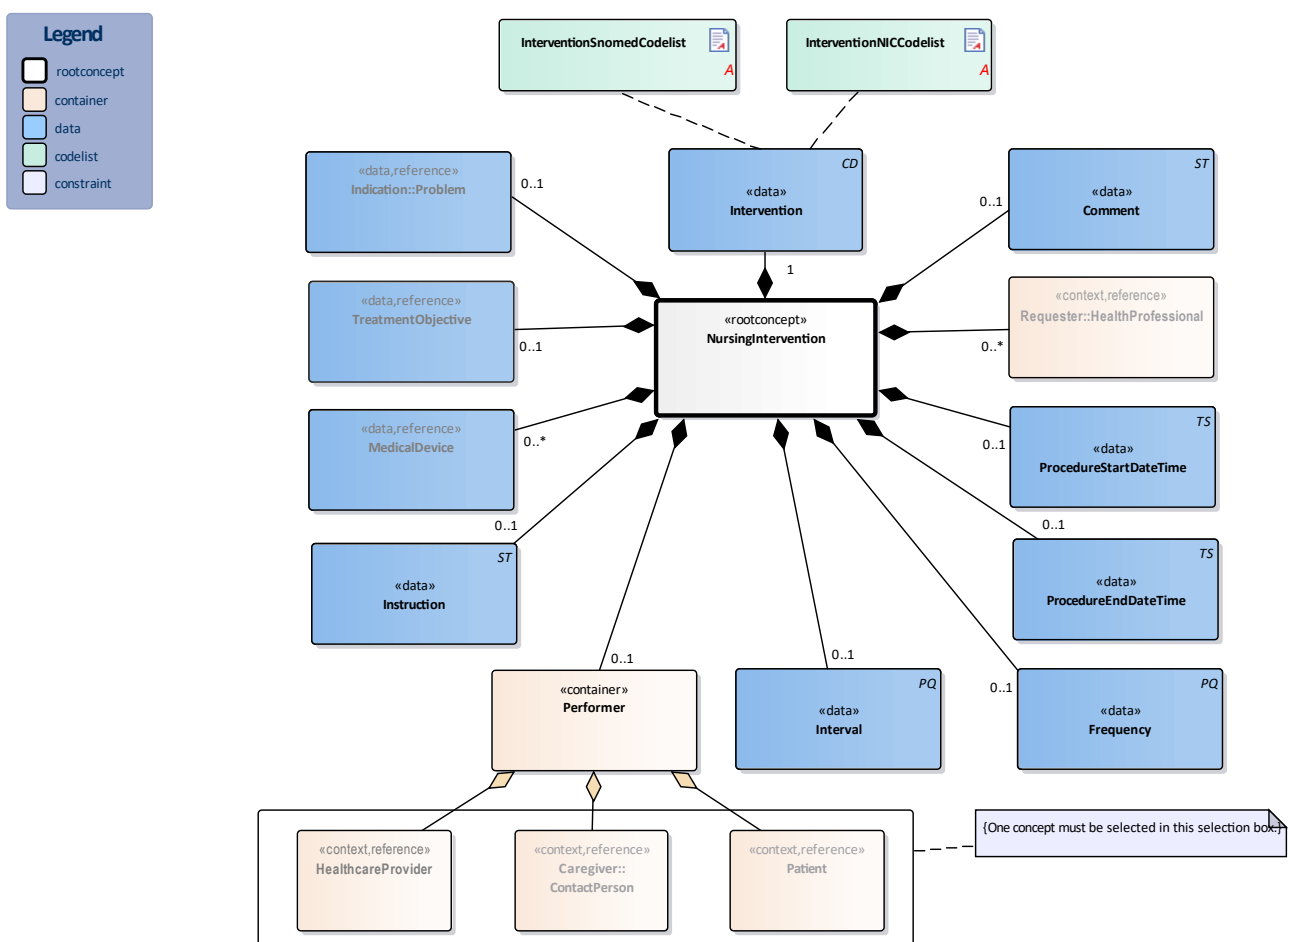

1.4 Purpose

The nursing interventions are an essential part of the nursing process. A nursing intervention is recorded to document the nursing policy and to update other health professionals on the intervention. The documentation of nursing interventions offers the option to determine whether the interventions outlined in the treatment plan have been carried out. This way, we can facilitate optimal nursing and continuity of care.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model

«rootconcept»	NursingIntervention	
Definitie	Root concept of the NursingIntervention information model. This root concept contains all data elements of the NursingIntervention information model.	
Datatype		
DCM::ConceptId	NL-CM:14.2.1	
DCM::DefinitionCode	SNOMED CT:9632001 Nursing procedure	
Opties		

«data»	Intervention
---------------	---------------------

Definitie	A nursing intervention is a treatment carried out by a nurse based on an expert opinion and clinical knowledge for the benefit of the person requesting healthcare. The intervention is targeted towards a certain problem (diagnosis) and has a predetermined healthcare result. It is possible to build a hierarchy of nursing interventions (where one intervention is part of another).	
Datatype	CD	
DCM::ConceptId	NL-CM:14.2.2	
DCM::ValueSet	InterventionNICodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.2.2
DCM::ValueSet	InterventionSnomedCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.2.4
Opties		

«data»	Indication::Problem	
Definitie	The nursing-related problem (indication) providing cause for the intervention.	
Datatype		
DCM::ConceptId	NL-CM:14.2.6	
DCM::ReferencedConceptId	NL-CM:5.1.1	This is a reference to the rootconcept of information model Problem.
Opties		

«data»	TreatmentObjective	
Definitie	The description of the treatment goal that the intervention decision is based on.	
Datatype		
DCM::ConceptId	NL-CM:14.2.14	
DCM::ReferencedConceptId	NL-CM:13.5.1	This is a reference to the rootconcept of information model TreatmentObjective.
Opties		

«data»	Interval	
Definitie	Interval indicates the time between planned procedures. When entering an interval, the focus is on the time between the consecutive procedures, such as in the treatment of a wound, for example. The exact times are of lesser importance.	
Datatype	PQ	
DCM::ConceptId	NL-CM:14.2.3	
Opties		

«data»	Frequency	
Definitie	The frequency describes how often and in which period certain procedures are carried out, e.g. 3x a day.	
Datatype	PQ	
DCM::ConceptId	NL-CM:14.2.4	
Opties		

«data»	ProcedureStartDateTime	
Definitie	The start date (and if possible start time) of the procedure. The concept offers the option to indicate the start of the period of a series of repeating procedures.	
Datatype	TS	
DCM::ConceptId	NL-CM:14.2.11	
DCM::ExampleValue	20120605	

Opties	
---------------	--

«data»	ProcedureEndDateTime	
Definitie	The end date (and if possible end time) of the procedure. The concept offers the option to indicate the end of the period of a series of repeating procedures.	
Datatype	TS	
DCM::ConceptId	NL-CM:14.2.12	
DCM::ExampleValue	20120607	
Opties		

«data»	MedicalDevice	
Definitie	Description of the materials used for the nursing procedure, such as bandages.	
Datatype		
DCM::ConceptId	NL-CM:14.2.13	
DCM::ReferencedConceptId	NL-CM:10.1.1	This is a reference to the rootconcept of information model MedicalDevice.
Opties		

«data»	Instruction	
Definitie	Instructions for performing the nursing action. This is particularly at issue when the action is performed by the patient himself or by a caregiver.	
Datatype	ST	
DCM::ConceptId	NL-CM:14.2.18	
Opties		

«container»	Performer	
Definitie	The person carrying out the nursing procedure.	
Datatype		
DCM::ConceptId	NL-CM:14.2.15	
Opties		

«context»	HealthcareProvider	
Definitie	The health professional carrying out the nursing procedure.	
Datatype		
DCM::ConceptId	NL-CM:14.2.7	
DCM::ReferencedConceptId	NL-CM:17.1.1	This is a reference to the rootconcept of information model HealthProfessional.
Opties		

«context»	Caregiver::ContactPerson	
Definitie	The caregiver carrying out the nursing procedure.	
Datatype		
DCM::ConceptId	NL-CM:14.2.16	
DCM::ReferencedConceptId	NL-CM:3.1.1	This is a reference to the rootconcept of information model ContactPerson.
Opties		

«context»	Patient	
Definitie	The patient carrying out the nursing procedure.	
Datatype		
DCM::ConceptId	NL-CM:14.2.17	

DCM::ReferencedConceptId	NL-CM:0.1.1	This is a reference to the rootconcept of information model Patient.
Opties		

«context»	Requester::HealthProfessional	
Definitie	The health professional who requested the nursing intervention. If desired, only the requester's specialty can be entered.	
Datatype		
DCM::ConceptId	NL-CM:14.2.8	
DCM::ExampleValue	0330 Neurologie	
DCM::ReferencedConceptId	NL-CM:17.1.1	This is a reference to the rootconcept of information model HealthProfessional.
Opties		

«data»	Comment	
Definitie	Comment on the nursing intervention.	
Datatype	ST	
DCM::ConceptId	NL-CM:14.2.5	
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment	
Opties		

«document»	InterventionNICodelist	
Definitie

1.8 Example Instances

VerpleegkundigeInterventie	
Interventie	Pijnmanagement
Indicatie	
ProbleemNaam	Pijn
Behandeldoel	
Streefwaarde	
MetingNaam	Pijnscore
UitslagWaarde	<4
UitslagDatumTijd	10-09-2015
VerpleegkundigeActie	
Activiteit	Ondersteuning van de wond bij hoesten.
ActieStartDatumTijd	10-08-2015
ActieEindDatumTijd	15-08-2015
VerpleegkundigeActie	
Activiteit	Toedienen medicatie volgens voorschrift bij pijnscore > 4.
ActieStartDatumTijd	10-08-2015
Toelichting	-

1.9 Instructions

For the nursing domain: when two parties use different classification systems, the SNOMED CT based Dutch nursing problem list is used for exchange of information, so that data becomes comparable and interchangeable. A mapping table is available from the Dutch nursing problem list to Omaha System, NANDA-I and ICF.

1.16 Functional Model

1.17 Traceability to other Standards

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Model and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.
