## 1.1 Revision History

Publicatieversie 1.0 (04-09-2017)

Publicatieversie 1.1 (31-12-2017)

Bevat: ZIB-646.

## 1.2 Concept

The head circumference is the size of the head as measured around the head.

## 1.3 Mindmap

## 1.4 Purpose

The head circumference can provide insight into the growth of a(n unborn) child. There may also be a smaller (microcephaly) or larger (macrocephaly) head circumference than average, which can indicate certain diseases or syndromes.

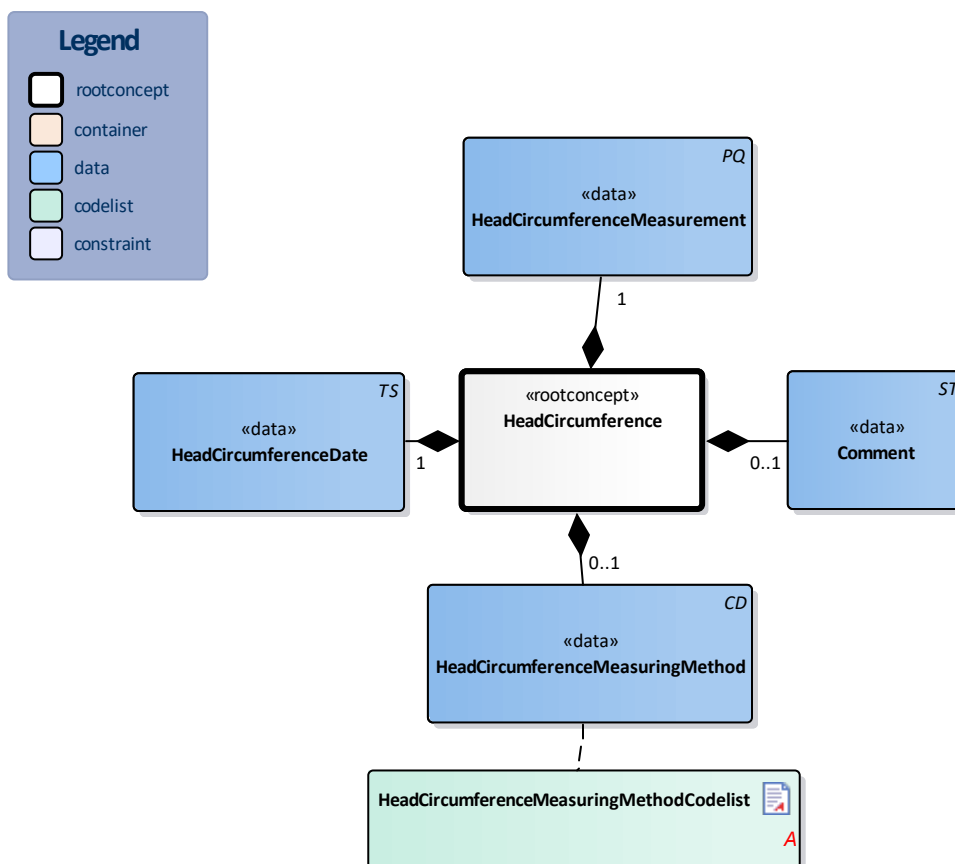

## 1.5 Patient Population

The HeadCircumference information model is meant for all patients, including unborn children.

## 1.6 Evidence Base

The definitions of the concepts were (partly) based on the guidelines Fetal Growth Retardation of the NVOG and PTEN Hamartoma Tumor Syndrome by the VKGN.
