1.1 Revision History

Publicatieversie 1.0 (15-04-2024)

Bevat: ZIB-1934.

1.2 Concept

A phenomenon with which a condition in the patient presents itself. This also includes a complaint or a finding, but not additional research, such as laboratory tests, function tests and imaging studies.

1.3 Mindmap

1.4 Purpose

Symptoms are an important basis for interpreting the condition (making the diagnosis) and for assessing the severity of the condition and the need for further examination or treatment. Symptoms and their course are also essential for evaluating the effectiveness of treatment.

1.5 Patient Population

1.6 Evidence Base

Note on zib Symptom A symptom refers to a phenomenon in a broad sense (including complaint and finding) with which a condition presents itself, but limited to symptoms that the patient notices himself or that a health professional can observe, if necessary with simple instruments.

Multiple symptoms may refer to the same condition, as a disorder or condition may present with > 1 symptom.

If a symptom changes, a new instance of zib Symptom with the same Symptom Name and a more recent SymptomStatusDate indicates how the symptom presented itself at that more recent date(time). A series of instances of Symptom with the same SymptonName then represents the course of the symptom by means of an increasing value for SymptomStatusDate.

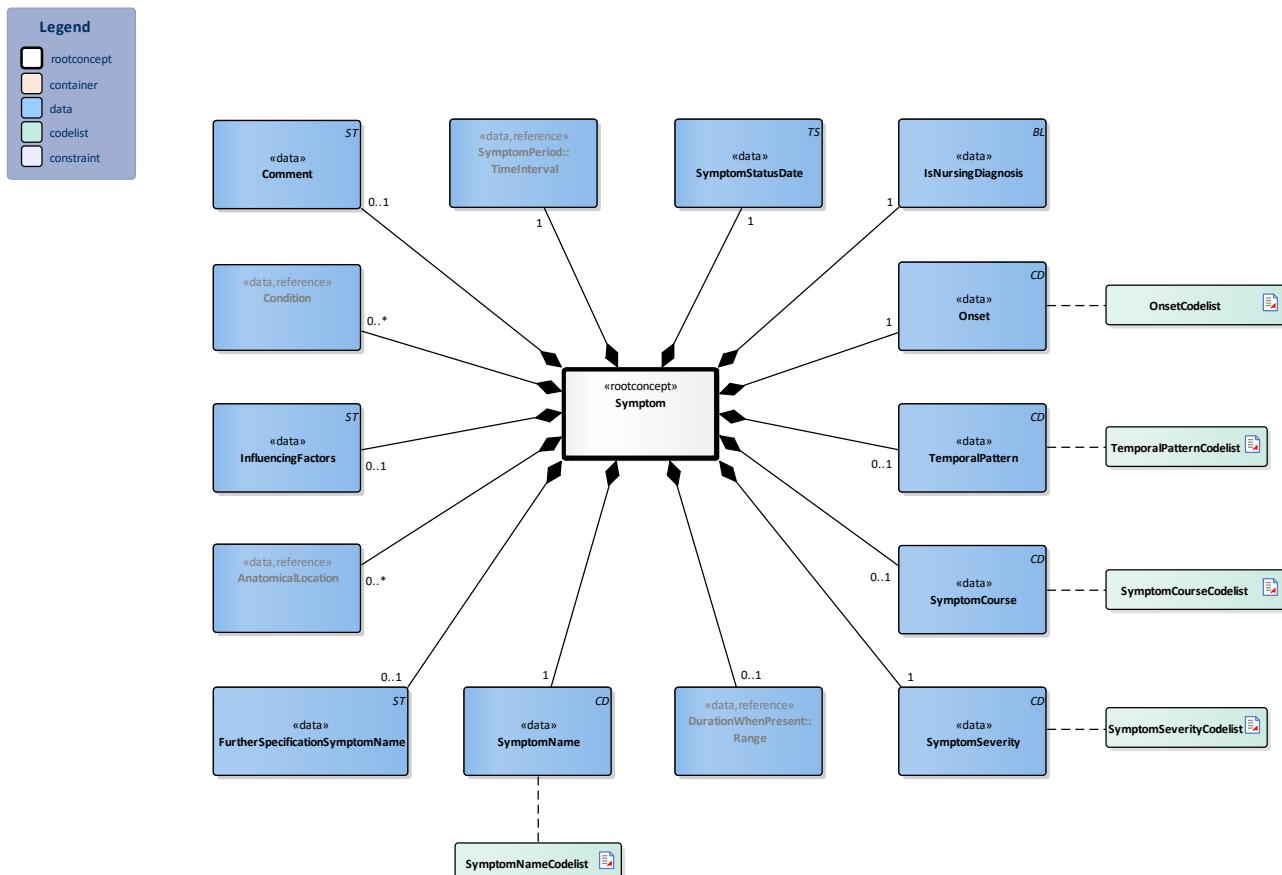

The cardinality of the reference to Condition is 0..1, because a denial of a symptom does not necessarily involve a condition or state to which that denial refers. To represent that a patient does not have a fever, one should use the zib Exclusion with a reference to Symptom. If the denial of fever stands alone, the instance of Symptom does not refer to a Condition. If the denial of fever explicitly refers to a certain condition, then the instance of Symptom does have a reference to the relevant Condition.

Example: in case a patient has a condition diagnosed with diverticulitis, the health professional may want to explicitly record that there is no fever, because fever is an indication for admission. In that case, the excluded symptom 'fever' will refer to the same condition as to which the diagnostic insight 'diverticulitis' refers.

Functionality (informative) It may happen that a health professional cannot yet make a (differential) diagnosis for a patient and can only indicate ≥ 1 important symptoms that he/she thinks belong together and can probably be explained by one condition. In this case, the EHR must create a new Condition and have the new instance(s) of Symptom refer to it. The EHR must also support that the health professional records ≥ 1 symptoms for a condition with an associated (differential) diagnosis. These symptoms then refer to the same condition.

When modifying an existing symptom, the EHR must have the new Symptom instance refer to the same Condition as the previous Symptom instance with the same SymptonName.

1.7 Information Model

«rootconcept»	Symptom
Definitie	This is a reference to the rootconcept of information model Symptom.
Datatype	
DCM::ConceptId	NL-CM:5.5.1

DCM::DefinitionCode	SNOMED CT: 162408000 algemene symptoombeschrijving	
Opties		

«data»	SymptomPeriod::TimeInterval	
Definitie	The period in which the symptom is (was) present.	
Datatype		
DCM::ConceptId	NL-CM:5.5.16	
DCM::DefinitionCode	SNOMED CT: 408731000 periode	
DCM::ReferencedConceptId	NL-CM:20.3.1	This is a reference to the rootconcept of information model TimeInterval.
Opties		

«data»	SymptomStatusDate	
Definitie	Date from which the specification of the symptom applies.	
Datatype	TS	
DCM::ConceptId	NL-CM:5.5.3	
DCM::DefinitionCode	SNOMED CT: 162499001 symptoom is veranderd	
Opties		

«data»	IsNursingDiagnosis	
Definitie	Indicates whether the symptom serves as a nursing diagnosis.	
Datatype	BL	
DCM::ConceptId	NL-CM:5.5.17	
DCM::DefinitionCode	SNOMED CT: 86644006 verpleegkundige diagnose	
Opties		

«data»	Onset	
Definitie	Indication how fast the symptom presented at first.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.5.5	
DCM::ValueSet	OnsetCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.5.2
Opties		

«data»	TemporalPattern	
Definitie	The temporal pattern with which the symptom presents itself, such as continuous or intermittent.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.5.6	
DCM::DefinitionCode	SNOMED CT: 288524001 beloop	
DCM::ValueSet	TemporalPatternCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.5.3
Opties		

«data»	SymptomCourse	
Definitie	The course of the intensity of the symptom over time, such as increased, unchanged.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.5.7	

DCM::ValueSet	SymptomCourseCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.5.4
Opties		

«data»	SymptomSeverity	
Definitie	Indicates the degree of severity of the symptom at the moment of the SymptomStatusDate.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.5.8	
DCM::DefinitionCode	SNOMED CT: 246112005 Ernst	
DCM::ValueSet	SymptomSeverityCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.5.5
Opties		

«data»	DurationWhenPresent::Range	
Definitie	Duration of an intermittent or paroxysmal symptom while it presents.	
Datatype		
DCM::ConceptId	NL-CM:5.5.9	
DCM::DefinitionCode	SNOMED CT: 162442009 duur van symptoom	
DCM::ReferencedConceptId	NL-CM:20.1.1	This is a reference to the rootconcept of information model Range.
Opties		

«data»	SymptomName	
Definitie	Name and code of the symptom via selection from a code list, based on a standardised coding system.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.5.10	
DCM::ValueSet	SymptomNameCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.5.8
Opties		

«data»	FurtherSpecificationSymptomName	
Definitie	More detailed specification of the symptomName that has been selected from the code list, because that list does not (yet) contain the required level of detail.	
Datatype	ST	
DCM::ConceptId	NL-CM:5.5.11	
Opties		

«data»	AnatomicalLocation	
Definitie	The location(s) on or in the body where the symptom presents itself.	
Datatype		
DCM::ConceptId	NL-CM:5.5.12	
DCM::DefinitionCode	SNOMED CT: 363698007 locatie van bevinding	
DCM::ReferencedConceptId	NL-CM:20.7.1	This is a reference to the rootconcept of information model AnatomicalLocation.
Opties		

«data»	InfluencingFactors	
Definitie	Actions, events or circumstances that influence the presentation of the symptom. Generally, this pertains to factors that aggravate or alleviate the	

	symptom.
Datatype	ST
DCM::ConceptId	NL-CM:5.5.13
Opties	

«data»	Condition	
Definitie	The condition of which the symptom is a manifestation.	
Datatype		
DCM::ConceptId	NL-CM:5.5.14	
DCM::DefinitionCode	SNOMED CT: 64572001 aandoening	
DCM::ReferencedConceptId	NL-CM:5.4.1	This is a reference to the rootconcept of information model Condition.
Opties		

«data»	Comment
Definitie	A comment in free text with respect to the symptom, that is not represented by the other data elements in the information model.
Datatype	ST
DCM::ConceptId	NL-CM:5.5.15
Opties

1.16 Functional Model

1.17 Traceability to other Standards

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Model and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NCSA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
