1.1 Revision History

Publicatieversie 1.0 (01-04-2015)

Bevat: ZIB-109, ZIB-132, ZIB-203, ZIB-204, ZIB-306, ZIB-308, ZIB-352.

Incl. algemene wijzigingsverzoeken:

ZIB-94, ZIB-154, ZIB-200, ZIB-201, ZIB-309, ZIB-324, ZIB-326.

1.2 Concept

An alert describes a clinical or administrative fact brought to the attention of the users of the clinical systems to be taken into account when shaping diagnostic and therapeutic policy or in dealing with the patient, usually because of a safety risk.

Disorders that describe the body's sensitivity to a substance which results in a specific physiological reaction after being exposed to that substance are referred to as allergies. These are described in a separate building block.

Warnings for non-allergic disorders can concern:

- A disorder (condition or diagnosis which can be considered as a contraindication for the use of groups of medication or undergoing a certain type of therapy), such as pregnancy or long QT syndrome
- Impaired functioning of an organ system (heart failure, impaired liver or kidney function, weakened immune system)

- Risk of spreading certain microorganisms (multi-resistant bacteria, tubercle bacilli, HIV, HBV, Ebola virus)
- Other risks

1.3 Mindmap

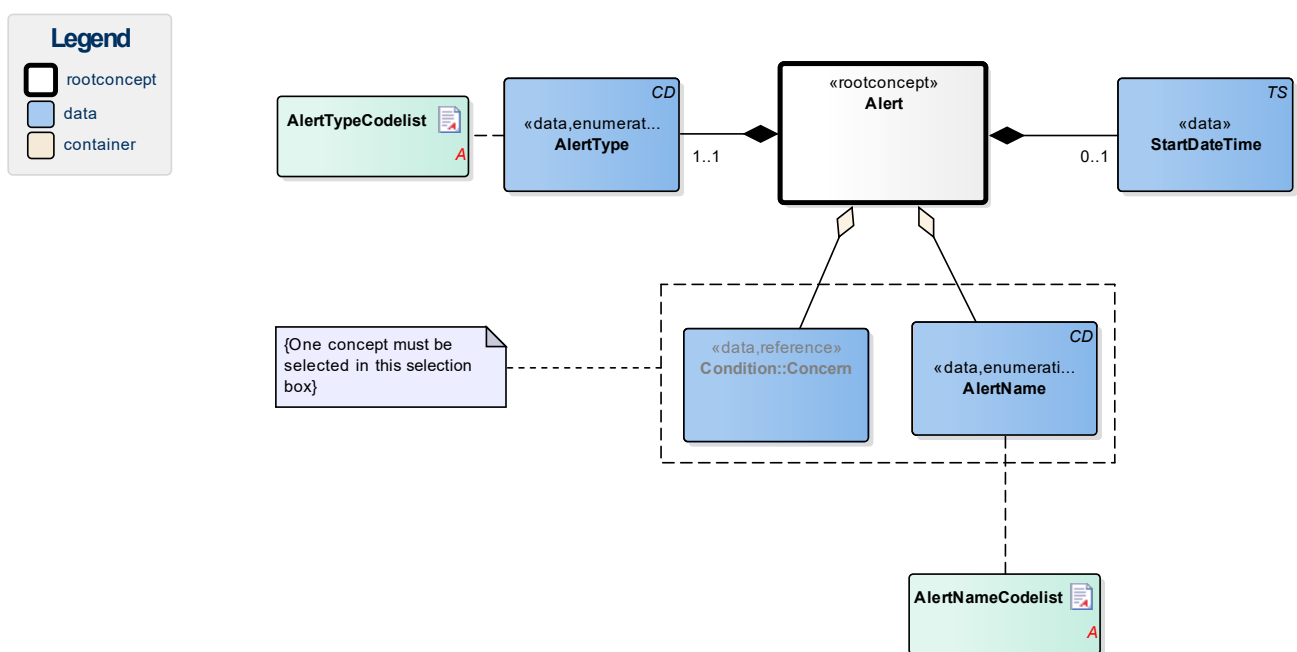

1.4 Purpose

Documenting and entering disorders or conditions that require attention is an important part of medical registration. It concerns the core of patient safety. In the execution of research and treatment, these patient characteristics - which are marked as a warning - constantly have to be taken into account. They provide information that is important for the patient's condition and the options a healthcare provider has for therapy. Disorders that are registered or transferred as an Alert can also be described as a Problem. The difference is in the fact that the healthcare provider considers the problem as an Alert = warning. In many cases, transfer will be subject to strict privacy rules, as the warning will not always elicit an adequate reaction in the informed environment.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model

«rootconcept»	Alert
Definitie	Root concept of the Alert building block. This root concept contains all data

	elements of the Alert building block.	
Datatype		
DCM::ConceptId	NL-CM:8.3.1	
Opties		

«data»	Condition::Concern	
Definitie	<p>The patient's health problem or condition that is the subject of the alert. This could involve a patient's problem, condition or diagnosis that is seen as a contraindication in prescribing medication or which has to be taken into account when shaping diagnostic and therapeutic policy. This can be in the patient's own interest, or it can involve a problem or disorder that can make the patient a risk to their surroundings, such as an infection hazard. These are references to conditions included on the patient's problem list.</p> <p>If there is a contraindication, the code system G-Standard Contraindications (Table 40) from the ProblemNameCodeList of the ConcernTransfer building block should be used.</p>	
Datatype		
DCM::ConceptId	NL-CM:8.3.3	
DCM::ExampleValue	VERMINDERDE NIERFUNCTIE	
DCM::ReferencedConceptId	NL-CM:5.1.1	This is a reference to concept Concern in information model OverdrachtConcern.
Opties		

«data»	AlertName	
Definitie	<p>A warning, other than a condition or problem. For example, a patient can be given an 'Aggressive patient' alert.</p> <p>The warning can be entered in code (there are codes for frequently used alerts), but seeing the dynamic nature of the warnings cf. SARS and Ebola, these alerts will often be entered as free text.</p>	
Datatype	CD	
DCM::ConceptId	NL-CM:8.3.4	
DCM::ValueSet	AlertNameCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.2
Opties		

«data»	StartDateTime	
Definitie	<p>The date and time at which the described condition was entered as a warning.</p> <p>This can be an exact date and time, or a rough indication of the date (such as only the year, or the month and the year).</p>	
Datatype	TS	
DCM::ConceptId	NL-CM:8.3.5	
DCM::ExampleValue	09-10-2011	
Opties		

«data»	AlertType	
Definitie	Indicates the type of alert, meaning a rough description of the cause or origin of the warning.	
Datatype	CD	

DCM::ConceptId	NL-CM:8.3.6	
DCM::ExampleValue	Conditie	
DCM::ValueSet	AlertTypeCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.1

1.18 Disclaimer

The program 'Registratie aan de Bron' [Registration at the Source] is a collaboration between the NFU (Nederlandse Federatie van Universitair Medische Centra, [Netherlands Federation of University Medical Centers]) and Nictiz, hereinafter referred to as the partners. Other parties outside the university medical centers and Nictiz also made important contributions to and worked within 'Registration at the Source'. The parties pay the utmost attention to the reliability and topicality of the data in these Healthcare Information Building Blocks (Clinical Building Block). Omissions and inaccuracies may however occur. The parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provided by the

parties to you or by you to the parties via a website or via e-mail, or any other digital means.

The parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of this Healthcare Information Building Block.

The parties will not accept any liability for the content of information in this Healthcare Information Building Block to which or from which a hyperlink is referred.

In the event of contradictions in said Healthcare Information Building Block documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of this Healthcare Information Building Block is also distributed in writing, the written version will be leading in cases of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the information in this Healthcare Information Building Block without limitations. The copyright provisions in the paragraph in question apply to copying, distributing and passing on information from this Healthcare Information Building Block.

1.20 Copyrights
