1.2 Concept

Measuring and documenting the body temperature of a person as a surrogate for a person's central body temperature (the highest temperature at the centre of the torso)

1.3 Mindmap

1.4 Purpose

Measuring the body temperature is of medical importance. A number of diseases are accompanied by characteristic changes in body temperature. The symptoms of some diseases can be tracked by measuring the body temperature. The healthcare provider can use this temperature development to determine the effect of the treatment.

1.7 Information Model

«rootconcept»	BodyTemperature
Definitie	Root concept of the BodyTemperature information model. This root concept contains all data elements of the BodyTemperature information model.
Datatype	
DCM::ConceptId	NL-CM:12.6.1
DCM::DefinitionCode	SNOMED CT: 56342008 Temperature taking
Opties	

«data»	TemperatureValue
Definitie	Body temperature is the temperature inside the body, measured in °C (degrees Celsius). The measurement method must be specified for a correct interpretation of the measurement value.
Datatype	PQ
DCM::ConceptId	NL-CM:12.6.2

DCM::DefinitionCode	LOINC: 8310-5 Body temperature	
DCM::ExampleValue	37,3 °C (graden Celcius)	
Opties		

«data»	TemperatureDateTime
Definitie	Date and time of measurement.
Datatype	TS
DCM::ConceptId	NL-CM:12.6.4
Opties	

«data»	Comment
Definitie	Comments or details that may be of importance in interpreting the measurement value.
Datatype	ST
DCM::ConceptId	NL-CM:12.6.3
Opties	

«data»	TemperatureType
Definitie	The TemperatureType indicates the way and place the measurement (temperature) has been performed.
Datatype	CD

1.16 Functional Model

1.17 Traceability to other Standards

This health and care information model is in accordance with the information model template Measurement v1.0.

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.
