## 1.2 Concept

A health professional is a person authorized to act in individual healthcare.

## 1.3 Mindmap

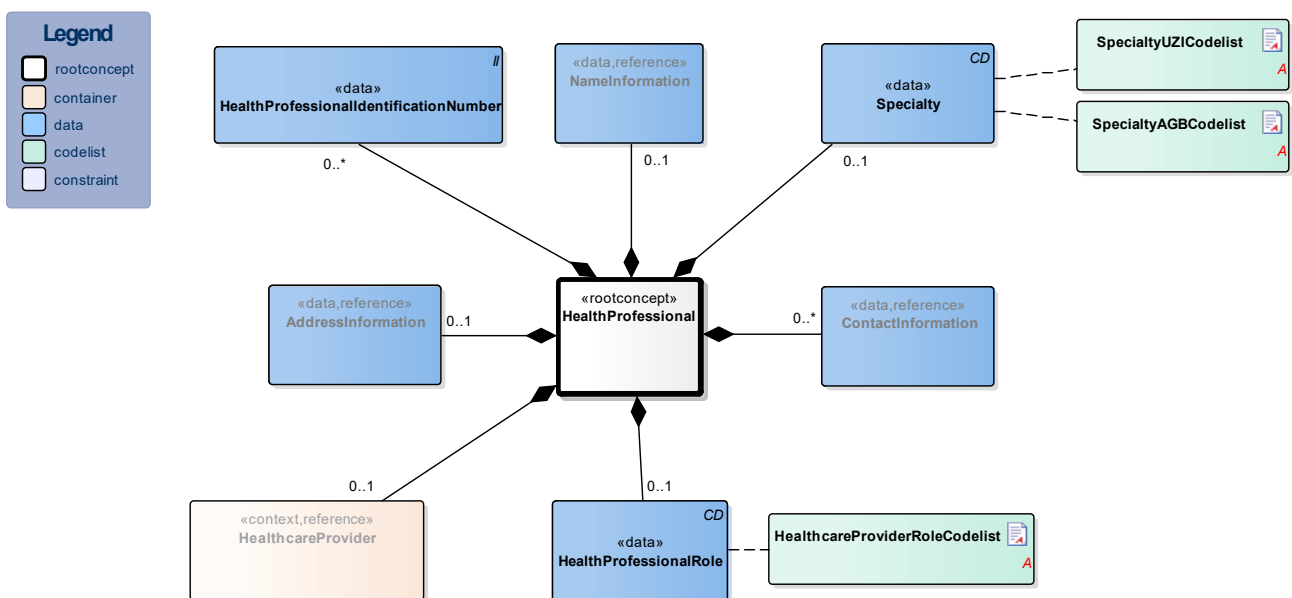

## 1.4 Purpose

The purpose of this information model is documenting the identity of people providing healthcare. For health professionals, information must be sufficiently complete for reference and auditing: if known, the name is mandatory. If an identification number is given such as a UZI or AGB number, the name and number have to match.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

## 1.9 Instructions

The concept HealthProfessionalRole can be expressed in two ways, as an element in the information model and as the definition code of a reference in another referring information model (Performer::HealthProfessional). In both cases, the code is taken from the same code list. If both possibilities are used, they should not be in conflict.
