1.2 Concept

Traditionally, a family is defined as a group of people of one or more adults who carry responsibility for caring for and raising one or more children.
Currently, the term is used more broadly for all forms of cohabitation which form a recognizable social unit, of people who are or who are not related and who have long-lasting, affective bonds and provide each other with support and care.

1.3 Mindmap

1.4 Purpose

Information on the patient's family situation is important in determining the extent to which the patient receives and can receive care and support. For example, the age of the patient's children partially

determines whether they can play a role in caregiving.

It is also important to know whether the patient needs support for daycare and/or care for dependent family members.

Situations in which this information is important include for example being discharged from the hospital or nursing home.

1.5 Patient Population

1.6 Evidence Base

1.7 Information Model

«rootconcept»	FamilySituation	
Definitie	Root concept of the FamilySituation information model. This concept contains all data elements of the FamilySituation information model.	
Datatype		
DCM::ConceptId	NL-CM:7.13.1	
DCM::DefinitionCode	SNOMED CT:365470003 Finding of family details and household composition	
Opties		

«data»	MaritalStatus
Definitie	Patient's marital status.
Datatype	

DCM::ConceptId	NL-CM:7.13.7	
DCM::ReferencedConceptId	NL-CM:7.9.1	This is a reference to the rootconcept of information model MaritalStatus.
Opties		

«data»	FamilyComposition	
Definitie	The family composition describes the patient's home situation and the form of cohabitation. A family can consist of one or more people.	
Datatype	CD	
DCM::ConceptId	NL-CM:7.13.8	
DCM::DefinitionCode	SNOMED CT:224130005 Household composition	
DCM::ValueSet	FamilyCompositionCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.7.13.1
Opties		

«data»	NumberOfChildren	
Definitie	The number of children the patient has. Children in the context of this information model include step children, foster children, biological and adopted children.	
Datatype	INT	
DCM::ConceptId	NL-CM:7.13.2	
DCM::DefinitionCode	SNOMED CT: 224118004 Number of offspring	
DCM::ExampleValue	3	
Opties		

«data»	NumberOfChildrenLivingAtHome	
Definitie	The number of children living at home with the patient.	
Datatype	INT	
DCM::ConceptId	NL-CM:7.13.9	
DCM::DefinitionCode	SNOMED CT:55811000146107 Number of children living at home	
Opties		

«data»	CareResponsibility	
Definitie	The activities the patient carries out to care for a dependent family member.	
Datatype	ST	
DCM::ConceptId	NL-CM:7.13.10	
Opties		

«data»	CommentFamilySituation	
Definitie	A comment on the family situation.	
Datatype	ST	
DCM::ConceptId	NL-CM:7.13.6	
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment	
DCM::ExampleValue	Beide inwonende kinderen zijn zeer zelfstandig.	
Opties		

«container»	Child
Definitie	Container of the Child concept. This container contains all data elements of the Child concept.
Datatype	
DCM::ConceptId	NL-CM:7.13.3
DCM::DefinitionCode	SNOMED CT: 67822003 Child
Opties	

«data»	DateOfBirth
Definitie	The child's date of birth.
Datatype	TS
DCM::ConceptId	NL-CM:7.13.4
DCM::DefinitionCode	LOINC: 21112-8 Birth date
DCM::ExampleValue	12-10-1985
Opties	

«data»	LivingAtHome
Definitie	An indication stating whether the child lives at home.
Datatype	BL
DCM::ConceptId	NL-CM:7.13.5
DCM::DefinitionCode	SNOMED CT: 107541000146102 Child lives at home
DCM::ExampleValue	Ja
Opties	

«data»	CommentChild
Definitie	A comment on the childs family situation.
Datatype	ST
DCM::ConceptId	NL-CM:7.13.11
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment
DCM::ExampleValue	Kind woont tijdelijk bij familie in het buitenland.
Opties

Kind	
Leeftijd	12
Inwonend	Ja
Kind	
Leeftijd	20
Inwonend	Ja
Kind	
Leeftijd	22
Inwonend	Nee
BurgerlijkeStaat	
BurgerlijkeStaat	Ongehuwd
Toelichting	Beide inwonende kinderen zijn zeer zelfstandig.

1.9 Instructions

Care for family members who depend on the patient is described in the Care Responsibility concept. Family members who can provide the patient with care as a caregiver are entered as a caregiver in the HelpFromOthers information model.

Because of KOPP policy (Kinderen van Ouders met Psychiatrische Problemen, or Children of Parents with Psychiatric Problems) mental healthcare facilities require a record stating whether there are children in the family. This means that in a mental healthcare situation, the number of children (living at home) must be recorded, with information per individual child or as a total number.

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Modesl and these rights are owned by the cooperating parties.
