1.1 Revision History

Publicatieversie 1.0 (01-07-2015)

Publicatieversie 3.0 (01-05-2016)
Bevat: ZIB-453

Publicatieversie 3.1 (04-09-2017)
Bevat: ZIB-530, ZIB-531, ZIB-541, ZIB-549

1.2 Concept

Being able to bathe independently is part of self-care. Limitations in this ability indicate a reduced ability to cope for oneself.
This activity and activities such as those including eating, drinking, and dressing are also known as activities of daily living (ADL). These are the activities people go through in daily life. The extent to which a person is able to do all these activities by themselves is a measure for their total ability to do things independently.

1.3 Mindmap

1.4 Purpose

Information on limitations in a patient's ability to bathe themselves is important in determining the nature and intensity of the care the patient needs. In a transfer situation, it gives the receiving organization the ability to anticipate the intensity of the care to be given to the patient, enabling continuity in healthcare for the patient.
If policy has been implemented to improve a patient's ability to do things independently, the entered extent

of independence helps to determine the efficiency of the treatment.

1.5 Patient Population

1.6 Evidence Base

In addition to this information model, there are other tools to record independence, such as the KATZ-ADL and the BarthelIndex. The KATZ-ADL is mainly used for vulnerable seniors and the BarthelIndex is mainly used for patients who have had a stroke.

This information model evaluates the ability to bathe on a three-point scale. In the KATZ-ADL and in the BarthelIndex, this falls under the aspect of Grooming. In these two tools, the ability is scored on a scale with fewer points.

1.7 Information Model

«rootconcept»	AbilityToWashOneself
Definitie	Root concept of the AbilityToWashOneself information model. This root concept contains all data elements of the AbilityToWashOneself information model.
Datatype	
DCM::ConceptId	NL-CM:4.10.1
Opties	

«data»	BathingOneself
Definitie	The washing and drying of the entire body, or body parts, such as bathing, showering, washing of hands and feet, face and hair. The BodyPartToBeBathed concept offers the option to specify to which part of the body the limitation applies.
Datatype	CO
DCM::ConceptId	NL-CM:4.10.2
DCM::DefinitionCode	SNOMED CT:284785009 Ability to wash self

DCM::ExampleValue	Afhankelijk
DCM::ValueSet	BathingOneselfCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.4.10.1
Opties	

«data»	BodyPartToBeBathed
Definitie	The part or parts of the body for which help bathing is wanted/necessary.
Datatype	CD
DCM::ConceptId	NL-CM:4.10.3
DCM::DefinitionCode	SNOMED CT: 38866009 body part structure
DCM::ExampleValue	Onderlichaam

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use

of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Modesl and these rights are owned by the cooperating parties.
The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NCSA-3.0).
The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also http://creativecommons.org/licenses/by-nc-sa/3.0/nl/)
This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.
