## 1.2 Concept

The OutcomeOfCare concept describes the determined status of the patient in terms of a certain problem. Comparing the healthcare result with the treatment objective provides insight into the effectivity of the nursing interventions/activities carried out for this problem. It is a part of the nursing process, together with nursing diagnoses/problems, the treatment objective and nursing interventions.

## 1.3 Mindmap

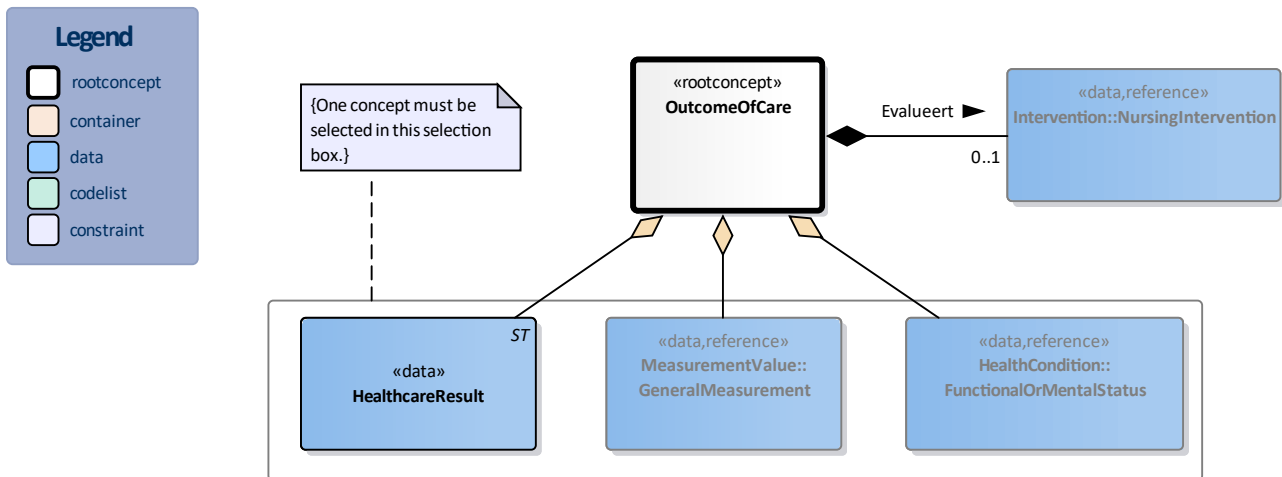

## 1.4 Purpose

Healthcare results are important parameters for evaluating the patient's health and monitoring the effectivity of the medical treatment and nursing interventions.
