1.1   Revision History

Publicatieversie 1.0 (01-09-2020)
Bevat: ZIB-825, ZIB-829, ZIB-895, ZIB-1135.

Publicatieversie 1.1 (01-12-2021)
Bevat: ZIB-1297.

Publicatieversie 1.2 (10-06-2022)
Bevat: ZIB-1611.

Publicatieversie 1.3 (15-10-2023)
Bevat: ZIB-1803, ZIB-1826, ZIB-1938.

1.2   Concept

Freedom restricting interventions are interventions that are used against the will of the person concerned and that consciously restrict the person's freedom to protect the person or his environment. This definition includes many forms of freedom restriction, such as (not exhaustive)

- Forced administration of fluid and nutrition
- Forced administration of medication
- Performing medical checks or other medical procedures
- Restricting freedom of movement
- Admitting to an accommodation and secluding when admitted to an accommodation.
- Exercising supervision
- Searching of clothing or body
- Restriction of visitors and the use of communication means

In the hospital, it is usually about restricting the freedom of movement, for example by using bed rails, moving a chair near to the table or using an arm splint for infusion. In combination with freedom-restricting interventions, soothing medication can be administered. In the case of small children, it is often a question of fixing hands, for example, to prevent a stomach tube from being pulled out.

For nurses to use it in hospitals, Dutch Nurses Association (V&VN) published a guideline [ref. 3].

In mental health care, care for the disabled and psychogeriatric care, it always concerns care that is used against the will of the patient.

The legal framework for using these interventions is (per 1-1-2020) governed by two laws, namely:

- The Wet verplichte ggz (Wvggz: Mandatory Care In Mental Health Act) for people with psychiatric disorders
- The Wet zorg en dwang (Wzd: Care and Compulsion Act) for people with intellectual disabilities and people with a psychogeriatric disorder, such as dementia.

The Wvggz refers to the term compulsory care, while the Wzd uses the term involuntary care.

A national registration system, the Argus registration, is used to register the interventions in the context of the Wvggz.

1.3   Mindmap

1.4   Purpose

Freedom-restricting interventions (also called involuntary / compulsory care) are applied to prevent or limit serious harm to the person concerned or others or to stabilize or restore the mental health of the person concerned.

Implementing freedom-restricting interventions is risky and can result in damage to the the person concerned if they are not carefully implemented. Health professionals fulfill an important role in identifying risks, observing the effect of the interventions and any changes to the policy in terms of involuntary/compulsory care. Recording all information on the interventions is of major importance for insight into decision-making, implementing, monitoring and evaluating the freedom-restricting interventions.

The reporting of applied freedom-restricting interventions is also part of the set of quality indicators of the Healthcare and Youth Care Inspectorate

1.5   Patient Population

1.6   Evidence Base

The Freedom-Restricting Intervention information model applies to both care in the hospital environment and to mental and disabled care and psychogeriatric care.

The reason for the revision of the information model is the fact that the Special Admissions for Psychiatric Hospitals Act (Bopz), on which the building block was partly based, will be replaced in January 2020 by two new laws, ie:

- The Wet verplichte ggz (Wvggz) for people with psychiatric disorders
- The Wet zorg en dwang (Wzd) for people with intellectual disabilities and people with a psychogeriatric disorder, such as dementia.

The new laws make new demands on what information is recorded. In the situations where the two above-mentioned laws apply, the information model is only applied when there is involuntary/compulsory care. That is why it is not recorded whether there has been resistance and to what extent.

Restrictions imposed on a voluntary basis - apart from a number of exceptions described in the law - are regarded as regular care and can be recorded with the appropriate information models.

Deciding whether involuntary / compulsory care is involved falls outside the scope of the building block.

The information model provides a start and end time for recording time registration. The last element is not relevant for all interventions: some interventions are momentary and not duration registrations.The information model offers the possibility to register a start and end time. The last element is not relevant for all interventions: some interventions are momentary and not duration registrations.

In this version the information model includes new value lists with interventions based on the aforementioned laws. Although is was attempted to achieve far-reaching harmonization in defining the interventions, it was nevertheless decided to make three separate lists for the different situations in order to simplify the correct application. The situations mentioned simply require other interventions.

1.7 Information Model
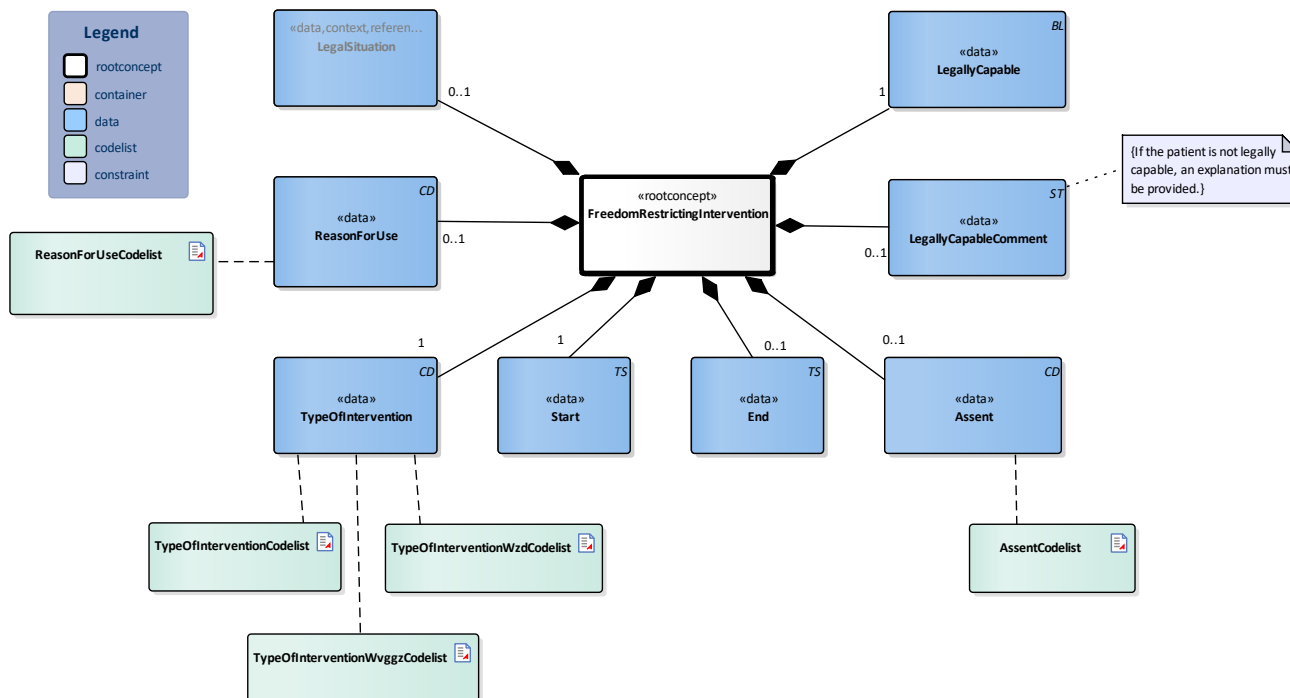

«rootconcept»	FreedomRestrictingIntervention	
Definitie	Root concept of the FreedomRestrictingIntervention information model.This root concept contains all data elements of the FreedomRestrictingIntervention information model.	
Datatype		
DCM::ConceptId	NL-CM:14.6.1	
Opties		

«data»	LegallyCapable	
Definitie	Indicator stating whether the patient is deemed capable of overseeing the consequences of a certain procedure, situation or decision.	
Datatype	BL	
DCM::ConceptId	NL-CM:14.6.2	
DCM::ExampleValue	Nee	
Opties		

«data»	LegallyCapableComment	
Definitie	Comment on the decisions which the patient is legally capable of making. The comment contains at least the reason why the person is incompetent to act for oneself.	
Datatype	ST	
DCM::ConceptId	NL-CM:14.6.3	
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment	
DCM::ExampleValue	Wilsonbekwaam t.a.v. beslissingen over geld.	

Opties	

«data»	LegalSituation	
Definitie	The legal situation that applies to the patient during the intervention.	
Datatype		
DCM::ConceptId	NL-CM:14.6.4	
DCM::ReferencedConceptId	NL-CM:7.17.1	This is a reference to the rootconcept of information model LegalSituation.
Opties		

«data»	TypeOfIntervention	
Definitie	The type of intervention describes the kind of freedom-restricting intervention/involuntary care.	
Datatype	CD	
DCM::ConceptId	NL-CM:14.6.5	
DCM::DefinitionCode	SNOMED CT: 225214000 Procedures relating to control, restraint, seclusion and segregation	
DCM::ExampleValue	Bewegingsalarm	
DCM::ValueSet	TypeOfInterventionWzdCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.6.3
DCM::ValueSet	TypeOfInterventionCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.6.1
DCM::ValueSet	TypeOfInterventionWvggzCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.6.2
Opties		

«data»	ReasonForUse	
Definitie	The reason for use provides the justification for applying involuntary care	
Datatype	CD	
DCM::ConceptId	NL-CM:14.6.6	
DCM::ValueSet	ReasonForUseCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.6.4
Opties		

«data»	Assent	
Definitie	The assent given to the health professional(s) by legal representative to implement the involuntary care.	
Datatype	CD	
DCM::ConceptId	NL-CM:14.6.7	
DCM::DefinitionCode	SNOMED CT: 309370004 Consent status	
DCM::ExampleValue	Instemming wettelijke vertegenwoordiger	
DCM::ValueSet	AssentCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.14.6.5
Opties		

«data»	Start	
Definitie	The date and time on which the intervention was carried out for point in time registrations or the date and time on which the intervention was started for duration registrations.	
Datatype	TS	
DCM::ConceptId	NL-CM:14.6.8	

DCM::ExampleValue	20-04--2014 13:00	
Opties		

«data»	End	
Definitie	The date and time at which the intervention ended.	
Datatype	TS	
DCM::ConceptId	NL-CM:14.6.9	
DCM::ExampleValue	01-05-2014 8:00	
Opties

1.16 Functional Model

1.17 Traceability to other Standards

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Modesl and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NCSA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also http://creativecommons.org/licenses/by-nc-sa/3.0/nl/)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
