1.2   Concept

! Attention: this information model is undergoing major revision. A new version will be available after summer.
Being able to get dressed independently is part of self-care. Limitations in this ability indicate a reduced ability to cope for oneself.
This activity and activities such as those including eating, drinking, and bathing are also known as activities of daily living (ADL). These are the activities people go through in daily life. The extent to which a person is able to do all these activities by themselves is a measure for their total ability to do things independently.

1.3   Mindmap

1.4 Purpose

Information on limitations in a patient's ability to dress themselves is important in determining the nature and intensity of the care the patient needs. In a transfer situation, it gives the receiving organization the ability to anticipate the intensity of the care to be given to the patient, enabling continuity in healthcare for the patient.
If policy has been implemented to improve a patient's ability to do things independently, the entered extent of independence helps to determine the efficiency of the treatment.
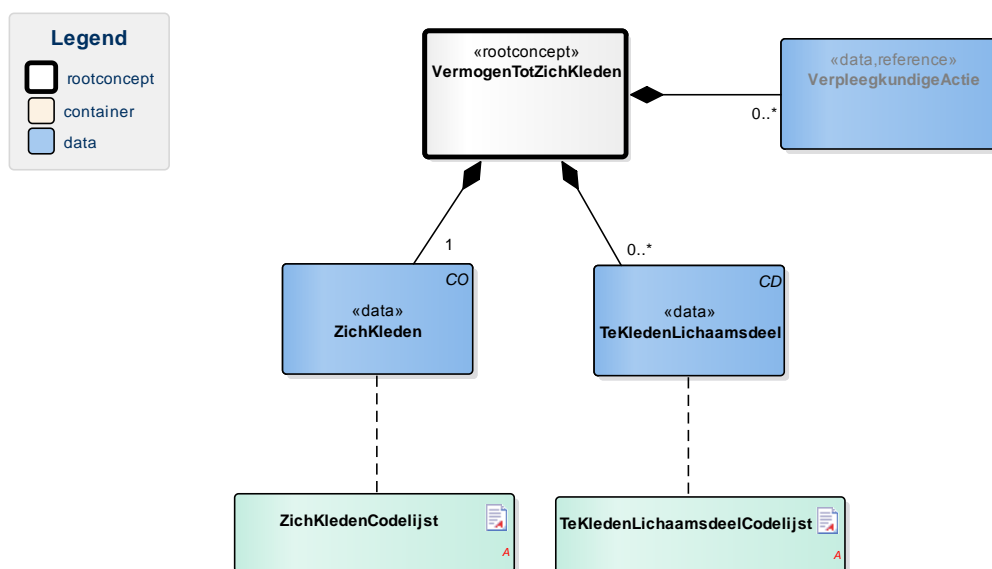

1.5 Patient Population

1.6 Evidence Base

The definitions of the concepts were (partially) taken from the ICF definitions.

In addition to this information model, there are other tools to record independence, such as the KATZ-ADL and the BarthelIndex. The KATZ-ADL is mainly used for vulnerable seniors and the BarthelIndex is mainly used for patients who have had a stroke.

This information model evaluates the ability to get dressed on a five-point scale. In the KATZ-ADL and in the BarthelIndex, this falls under the aspect of Dressing. In these two tools, the ability is scored on a scale with fewer points.

1.7 Information Model

«rootconcept»	VermogenTotZichKleden

Definitie	Root concept of the AbilityToGetDressed information model. This root concept contains all data elements of the AbilityToGetDressed information model.	
Datatype		
DCM::DefinitionCode	NL-CM:4.11.1	
Opties		

«data»	ZichKleden	
Definitie	Dressing includes carrying out coordinated procedures and tasks for dressing and undressing and putting on and taking off shoes in the right order, with the outfit being appropriate for the social setting and weather. The BodyPartToBeDressed concept offers the option to specify to which part of the body the limitation applies. If no part of the body is indicated, the limitation will be assumed to apply to the entire body.	
Datatype	CO	
DCM::DefinitionCode	ICF: d540 Zich kleden	
DCM::DefinitionCode	NL-CM:4.11.2	
DCM::ExampleValue	Lichte beperking	
DCM::ValueSet	ZichKledenCodelijst	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.4.11.1
Opties		

«data»	TeKledenLichaamsdeel	
Definitie	The part or parts of the body for which help getting dressed is wanted/necessary.	
Datatype	CD	
DCM::DefinitionCode	SNOMED CT: 38866009 Body part structure	
DCM::DefinitionCode	NL-CM:4.11.3

1.18 Disclaimer

This Health and Care Information Model (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of this Health and Care Information Model. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of this Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the information in this Health and Care Information Model without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on information from this Health and Care Information Model.
