Publicatieversie 3.4 (06-07-2019)

Bevat: ZIB-813.

Publicatieversie 4.0 (31-01-2020)

Bevat: ZIB-905, ZIB-526.

Publicatieversie 4.1 (01-09-2020)

## 1.2 Concept

An alert describes a clinical or administrative fact brought to the attention of the users of the clinical systems to be taken into account when shaping diagnostic and therapeutic policy or in dealing with the patient, usually because of a safety risk.

Disorders that describe the body's sensitivity to a substance which results in a specific physiological reaction after being exposed to that substance are referred to as allergies. These are described in a separate information model.

Warnings for non-allergic disorders can concern:

- A disorder, condition or diagnosis which can be considered as a contraindication for undergoing a certain type of therapy, such as pregnancy or long QT syndrome;
- Impaired functioning of an organ system (heart failure, impaired liver or kidney function, weakened immune system);
- Risk of spreading certain microorganisms (multi-resistant bacteria, tubercle bacilli, HIV, HBV, Ebola virus);
- Other risks

## 1.3 Mindmap

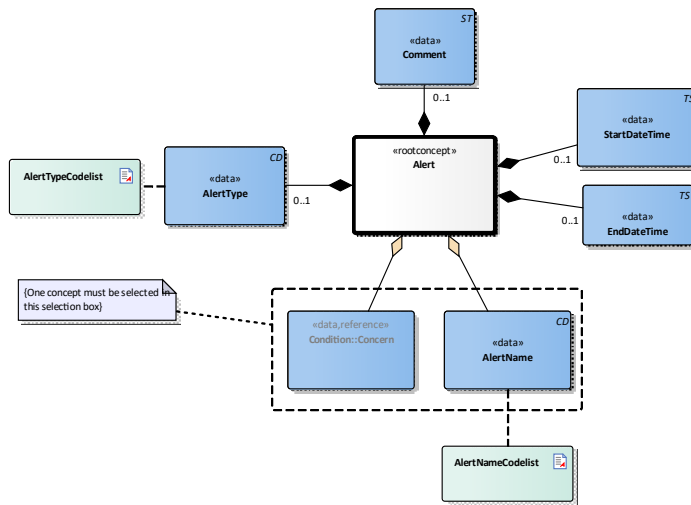

## 1.4 Purpose

Documenting and entering disorders or conditions that require attention is an important part of medical registration. It concerns the core of patient safety. In the execution of research and treatment, these patient characteristics - which are marked as a warning - constantly have to be taken into account. They provide information that is important for the patient's condition and the options a healthcare provider has for therapy. Disorders that are registered or transferred as an Alert can also be described as a Problem. The difference is in the fact that the healthcare provider considers the problem as an Alert = warning. In many cases, transfer will be subject to strict privacy rules, as the warning will not always elicit an adequate reaction in the informed environment.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

«rootconcept»	Alert
<b>Definitie</b>	Root concept of the Alert information model. This root concept contains all data elements of the Alert information model.
<b>Datatype</b>	
<b>DCM::ConceptId</b>	NL-CM:8.3.1
<b>Opties</b>	

«data»	EndDateTime
<b>Definitie</b>	The date and time at which the described condition was retracted as a warning. This can be an exact date and time, or a rough indication of the date (such as only the year, or the month and the year).
<b>Datatype</b>	TS
<b>DCM::ConceptId</b>	NL-CM:8.3.8
<b>DCM::ExampleValue</b>	07-01-2020
<b>Opties</b>	

«data»	Condition::Concern
<b>Definitie</b>	The patient's health problem or condition that is the subject of the alert. This could involve a patient's problem, condition or diagnosis that is seen as a contraindication in prescribing medication or which has to be taken into account when shaping diagnostic and therapeutic policy. This can be in the patient's own interest, or it can involve a problem or disorder that can make the patient a risk to their surroundings, such as an infection hazard. These are references to conditions included on the patient's problem list.
<b>Datatype</b>	
<b>DCM::ConceptId</b>	NL-CM:8.3.3
<b>DCM::ExampleValue</b>	VERMINDERDE NIERFUNCTIE
<b>DCM::ReferencedConceptId</b>	NL-CM:5.1.1
	This is a reference to the rootconcept of information model Problem.
<b>Opties</b>	

«data»	AlertName
<b>Definitie</b>	A warning, other than a condition or problem. For example, a patient can

	be given an 'Aggressive patient' alert. The warning can be entered in code (there are codes for frequently used alerts), but seeing the dynamic nature of the warnings cf. SARS and Ebola, these alerts will often be entered as free text.	
<b>Datatype</b>	CD	
<b>DCM::ConceptId</b>	NL-CM:8.3.4	
<b>DCM::ValueSet</b>	AlertNameCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.2
<b>Opties</b>		

<b>«data»</b>	<b>StartDateTime</b>	
<b>Definitie</b>	The date and time at which the described condition was entered as a warning. This can be an exact date and time, or a rough indication of the date (such as only the year, or the month and the year).	
<b>Datatype</b>	TS	
<b>DCM::ConceptId</b>	NL-CM:8.3.5	
<b>DCM::ExampleValue</b>	09-10-2011	
<b>Opties</b>		

<b>«data»</b>	<b>AlertType</b>	
<b>Definitie</b>	Indicates the type of alert, meaning a rough description of the cause or origin of the warning.	
<b>Datatype</b>	CD	
<b>DCM::ConceptId</b>	NL-CM:8.3.6	
<b>DCM::ExampleValue</b>	Conditie	
<b>DCM::ValueSet</b>	AlertTypeCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.8.3.1
<b>Opties</b>		

<b>«data»</b>	<b>Comment</b>	
<b>Definitie</b>	Explanatory comments to the alert that can not be expressed in any of the other elements.	
<b>Datatype</b>	ST	
<b>DCM::ConceptId</b>	NL-CM:8.3.7	
<b>DCM::DefinitionCode</b>	LOINC: 48767-8 Annotation comment

Waarschuwing	01-06-2010	---	Drager MRSA

## 1.9 Instructions

If there is a contraindication which is also important for medication safety, it should also be registered via the g-standard (Thesaurus 40). See further HCIM MedicationContraIndication.

## 1.10 Interpretation

### 1.11 Care Process

### 1.12 Example of the Instrument

### 1.13 Constraints

### 1.14 Issues

### 1.15 References

### 1.16 Functional Model

### 1.17 Traceability to other Standards

### 1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the

data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

### **1.19 Terms of Use**

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

### **1.20 Copyrights**

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
